~~I owned a '94 protege back in the day, and it was the best car I ever had. I drove it everywhere in Canada, and it never quit on me. It was a basic, 4 door, automatic sedan that I drove to the ground. My experience with Mazda proteges has been awesome. This protege is no exception, it drove well, was great on gas, and was well maintained.~~

~~An expat detective navigates through seamy, steamy Bangkok in this novel in the international bestselling and Shamus Award–winning series. When PI Vincent Calvino ' s surveillance of a drug piracy ring ends in definitive video evidence, it looks like the fortunes of the American expatriate and disbarred lawyer are about to turn. But when Calvino ' s client dies of a heart attack, and he finds the body of a murdered massage girl downstairs, the Thai authorities get suspicious of the farang who was in the wrong place at the wrong time . . . twice. To make matters worse, with the dead man unlikely to pay, Calvino is forced to take on a job he doesn ' t want, trailing the spouses of three expat housewives who have been rattled by " The Risk of Infidelity Index, " a handbook that ranks Bangkok as the city where men are most likely to stray. Unfortunately for Calvino, jealous wives tend to be unhappy, regardless of the results, and drug pirates aren ' t the type to play nice . . . " Underneath Bangkok society is a deeply encrusted demiworld of hope, despair, corruption, and courage that Moore . . paints with maestrolike Dickensian strokes. " —The Seattle Times " A terrific character . . . A terrific writer. " —T. Jefferson Parker~~

~~One of the first women's organizations to mask and perform during Mardi Gras, the Million Dollar Baby Dolls redefined the New Orleans carnival tradition. Tracing their origins from Storyville-era brothels and dance halls to their re-emergence in post-Katrina New Orleans, author Kim Marie Vaz uncovers the fascinating history of the "raddy-walking, shake-dancing, cigar-smoking, money-flinging" ladies who strutted their way into a predominantly male establishment. The Baby Dolls formed around 1912 as an organization of African American women who used their profits from working in New Orleans's red-light district to compete with other Black prostitutes on Mardi Gras. Part of this event involved the tradition of masking, in which carnival groups create a collective identity through costuming. Their baby doll costumes -- short satin dresses, stockings with garters, and bonnets -- set against a bold and provocative public behavior not only exploited stereotypes but also empowered and made visible an otherwise marginalized female demographic. Over time, different neighborhoods adopted the Baby Doll tradition, stirring the creative imagination of Black women and men across New Orleans, from the downtown Trem area to the uptown community of Mahalia Jackson. Vaz follows the Baby Doll phenomenon through one hundred years with photos, articles, and interviews and concludes with the birth of contemporary groups, emphasizing these organizations' crucial contribution to Louisiana's cultural history.~~

~~All organizations must cope with future uncertainties. These uncertainties affect the strategic choices they make. They must commit scarce organizational resources to future outcomes which they have little assurance will come into being. Marcus explores how decision makers in the energy industry made choices in the face of such uncertainties, specifically examining two major uncertainties they confronted in the~~

2012-2018 period - price volatility and climate change. Marcus tells the story of how different companies in the integrated oil and natural gas sector and in the motor vehicle sector responded to these uncertainties. In the face of these challenges, companies in the energy industry hedged their bets by staking out paradoxical or contrasting positions. On the one hand, they focused on capturing as much gain as they could from the world's current dependence on fossil fuels and on the other hand they made preparations for a future in which fossil fuels might not be the world's dominant energy source.
