from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Here is a vast collection of nautical imagery that doubles as a history of maritime illustration throughout the ages. Arranged thematically, the more than 1,600 line drawings encompass shipbuilding designs, navigational instruments, lighthouses, trade and smuggling, guns and armaments, famous ships and seafarers, and exotica. This is an indispensable resource for artists, designers, and naval enthusiasts. Includes 16 full-color pages.

This volume contains a selection of 2500 maritime and related illustrations which have been gathered together from a wide range of sources. Colour images, line drawings, diagrams and vignettes are amassed from sources that span graphic types from antiquity to the present day.
