Adomnan, abbot of the island now known as Iona, whose attempt to establish a more peaceful society is remembered a

The Britain of 600-800 AD was populated by four distinct peoples; the British, Picts, Irish and Anglo-Saxons. They spoke 3 different languages, Gaelic, Brittonic and Old English, and lived in a diverse cultural environment. In 600 the British and the Irish were already Christians. In contrast the conversion of the Anglo-Saxons and Picts occurred somewhat later, at the end of the 6th and during the 7th century. Religion was one of the ways through which cultural difference was expressed, and the rulers of different areas of Britain dictated the nature of the dominant religion in areas under their control. This book uses the Conversion and the Christianisation of the different peoples of Britain as a framework through which to explore the workings of their political systems and the structures of their society. Because Christianity adapted to and affected the existing religious beliefs and social norms wherever it was introduced, it 's the perfect medium through which to study various aspects of society that are difficult to study by any other means.

An accessible, popular account of the 7th-century life of Adomnan of Iona, from his boyhood in Donegal to his death as Abbot of Iona, with an emphasis on the contemporary significance of his Law of Innocents.

When scholars discuss the medieval past, the temptation is to become immersed there, to deepen our appreciation of the nuances of the medieval sources through debate about their meaning. But the past informs the present in a myriad of ways and medievalists can, and should, use their research to address the concerns and interests of contemporary society. This volume presents a number of carefully commissioned essays that demonstrate the fertility and originality of recent work in Medieval Studies. Above all, they have been selected for relevance. Most contributors are in the earlier stages of their careers and their approaches clearly reflect how interdisciplinary methodologies applied to Medieval Studies have potential repercussions and value far beyond the boundaries of the Middle Ages. These chapters are powerful demonstrations of the value of medieval research to our own times, both in terms of providing answers to some of the specific questions facing humanity today and in terms of much broader considerations. Taken together, the research presented here also provides readers with confidence in the fact that Medieval Studies cannot be neglected without a great loss to the understanding of what it means to be human.

The History begins with the first full-scale critical consideration of Scotland's earliest literature, drawn from the diverse cultures and languages of its early peoples. The first volume covers the literature produced during the medieval and early modern period in Scotland, surveying the riches of Scottish work in Gaelic, Welsh, Old Norse, Old English and Old French, as well as in Latin and Scots. New scholarship is brought to bear, not only on imaginative literature, but also law, politics, theology and philosophy, all placed in the context of the evolution of Scotland's geography, history, languages and material cultures

This is the first comprehensive study of the contribution that texts from Britain and Ireland made to the development of canon law in early medieval Europe. The book concentrates on a group of insular texts of church law—chief among them the Irish Hibernensis—tracing their evolution through mutual influence, their debt to late antique traditions from around the Mediterranean, their reception (and occasional rejection) by clerics in continental Europe, their fusion with continental texts, and their eventual impact on the formation of a European canonical tradition. Canonical collections, penitentials, and miscellanies of church law, and royal legislation, are all shown to have been 'living texts', which were continually reshaped through a process of trial and error that eventually gave rise to a more stable and more coherent body of church laws. Through a meticulous text-critical study Roy Flechner argues that the growth of church law in Europe owes as much to a serendipitous 'conversation' between texts as it does to any deliberate plan overseen by bishops and popes.

Shortlisted for the 2009 Saltire Society History Book of the Year. From Caledonia to Pictland examines the transformation of Iron Age northern Britain into a land of Christian kingdoms, long before 'Scotland' came into existence. Perched at the edge of the western Roman Empire, northern Britain was not unaffected by the experience, and became swept up in the great tide of processes which gave rise to the early medieval West. Like other places, the country experienced social and ethnic metamorphoses, Christianisation, and colonization by dislocated outsiders, but northern Britain also has its own unique story to tell in the first

eight centuries AD. This book is the first detailed political history to treat these centuries as a single period, with due regard for Scotland's position in the bigger story of late Antique transition. From Caledonia to Pictland charts the complex and shadowy processes which saw the familiar Picts, Northumbrians, North Britons and Gaels of early Scottish history become established in the country, the achievements of their foremost political figures, and their ongoing links with the world around them. It is a story that has become much revised through changing trends in scholarly approaches to the challenging evidence, and that transformation too is explained for the benefit of students and general readers.
