This book will tell all you need to know about British English spelling. It's a reference work intended for anyone interested in the English language, especially those who teach it, whatever the age or mother tongue of their students. It will be particularly useful to those wishing to produce well-designed materials for teaching initial literacy via phonics, for teaching English as a foreign or second language, and for teacher training. English spelling is notoriously complicated and difficult to learn; it is correctly described as much less regular and predictable than any other alphabetic orthography. However, there is more regularity in the English spelling system than is generally appreciated. This book provides, for the first time, a thorough account of the whole complex system. It does so by describing how phonemes relate to graphemes and vice versa. It enables searches for particular words, so that one can easily find, not the meanings or pronunciations of words, but the other words with which those with unusual phoneme-grapheme/grapheme-phoneme correspondences keep company. Other unique features of this book include teacher-friendly lists of correspondences and various regularities not described by previous authorities, for example the strong tendency for the letter-name vowel phonemes (the names of the letters) to be spelt with those single letters in non-final syllables.

This Level 1 guided reader explores the parts and uses of farm quads. Students will develop word recognition and reading skills while learning about what happens on a farm.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for additional costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

John Holt's groundbreaking study examines the assimilation, transformation, and subordination of the Hindu deity Visnu within the contexts of Sri Lankan history and Sinhala Buddhist religious culture. Holt argues that political agendas and social forces, as much as doctrinal concerns, have shaped the shifting patterns of the veneration of Visnu in Sri Lanka. Holt begins with a comparative look at the assimilation of the Buddha in Hinduism. He then explores the role and rationale of medieval Sinhala kings in assimilating Visnu into Sinhala Buddhism. Offering analyses of texts, many of which have never before been translated into English, Holt considers the development of Visnu in Buddhist literature and the changing practices of deity veneration. Shifting to the present, Holt describes the efforts of contemporary Buddhist monks in Sri Lanka to discourage the veneration of Visnu, suggesting that many are motivated by a reactionary fear that their culture and society will soon be overrun by the influences and practices of Hindus, Muslims, and Christians.

A report from the front lines of higher education and technology that chronicles efforts to transform teaching, learning, and opportunity. Colleges and universities have become increasingly costly, and, except for a handful of highly selective, elite institutions, unresponsive to twenty-first-century needs. But for the past few years, technology-fueled innovation has begun to transform higher education, introducing new ways to disseminate knowledge and better ways to learn—all at lower cost. In this impassioned account, Richard DeMillo tells the behind-the-scenes story of these pioneering efforts and offers a roadmap for transforming higher education. Building on his earlier book, Abelard to Apple, DeMillo argues that the current system of higher education is clearly unsustainable. Colleges and universities are in financial crisis. Tuition rises inexorably. Graduates of reputable schools often fail to learn basic skills, and many cannot find suitable jobs. Meanwhile, student-loan default rates have soared while the elite Ivy and near-Ivy schools seem remote and irrelevant. Where are the revolutionaries who can save higher education? DeMillo's heroes are a small band of innovators who are bringing the revolution in technology to colleges and universities. DeMillo chronicles, among other things, the invention of MOOCs (Massive Open Online Courses) by professors at Stanford and MIT; Salman Khan's Khan Academy; the use of technology by struggling historically black colleges and universities to make learning more accessible; and the latest research on learning and the brain. He describes the revolution's goals and the entrenched hierarchical system it aims to overthrow and he reframes the nature of the contract between society and its universities. The new institutions of a transformed higher education promise to demonstrate not only that education has value but also that it has values—virtues for the common good.

Pagans and Philosophers explores how writers—philosophers and theologians, but also poets such as Dante, Chaucer, and Langland, and travelers such as Las Casas and Ricci—tackled the Problem of Paganism. Augustine and Boethius set its terms, while Peter Abelard and John of Salisbury were important early advocates of pagan wisdom and virtue. University theologians such as Aquinas, Scotus, Ockham, and Bradwardine, and later thinkers such as Ficino, Valla, More, Bayle, and Leibniz, explored the difficulty in depth. Meanwhile, Albert the Great inspired Boethius of Dacia and others to create a relativist conception of scientific knowledge that allowed Christian teachers to remain faithful Aristotelians. At the same time, early anthropologists such as John of Piano Carpini, John Mandeville, and Montaigne developed other sorts of relativism in response to the issue.

In the third book in the series, young Alien Agent Zack Gather is sent to Mongolia to liaise with his fellow agent Vraj, whom we met in Camp Alien. Vraj's people, the Tirgizians, are exploring the area for evidence of dinosaurs, whom the Tirgizians believe to be their long-lost ancestors. Enter the Kaipa Kaps Syndicate, a mixture of bad guys, including the Gnairts who'd previously tried to kill Zack and Vraj. The syndicate kidnaps the Tirgizians, and with the help of two local Mongolian kids, Zack and Vraj manage to free them and avoid being discovered.

The Roman philosopher Boethius (c. 480–524) is best known for the Consolation of Philosophy, one of the most frequently cited texts in medieval literature. In the Consolation, an unnamed Boethius sits in prison awaiting execution when his muse Philosophy appears to him. Her offer to teach him who he truly is and to lead him to his heavenly home becomes a debate about how to come to terms with evil, freedom, and providence. The conventional reading of the Consolation is that it is a defense of pagan philosophy; nevertheless, many readers who accept this basic argument find that the ending is ambiguous and that Philosophy has not, finally, given the prisoner the comfort she had promised. In *The Prisoner's Philosophy*, Joel C. Relihan delivers a genuinely new reading of the Consolation. He argues that it is a Christian work dramatizing not the truths of philosophy as a whole, but the limits of pagan philosophy in particular. He views it as one of a number of literary experiments of late antiquity, taking its place alongside Augustine's Confessions and Soliloquies as a spiritual meditation, as an attempt by Boethius to speak objectively about the life of the mind and its relation to God. Relihan discerns three fundamental stories intertwined in the Consolation: an ironic retelling of Plato's *Crito*, an adaptation of Lucian's *Jupiter Confutatus*, and a sober reduction of Job to a quiet dialogue in which the wounded innocent ultimately learns wisdom in silence. Relihan's claim that Boethius's text was written as a Menippean satire does not rest merely on identifying a mixture of disparate literary influences on the text, or on the combination of verse and prose or of fantasy and morality. More important, Relihan argues, Boethius deliberately dramatizes the act of writing about systematic knowledge in a way that calls into question the value of that knowledge. Philosophy's attempt to lead an exile to God's heaven is rejected; the exile comes to accept the value of the phenomenal world, and theology replaces philosophy to explain the place of human beings in the order of the world. Boethius Christianizes the genre of Menippean satire, and his Consolation is a work about humility and prayer. "Acknowledging that the Consolation of Philosophy is 'over-familiar and under-read,' Joel Relihan puts to the side old bromides about the work and instead pays careful attention to the narrative(s) Boethius constructs, grounding his readings in the contexts the work cultivates, especially its Menippean elements. The result is perhaps the first satisfying reading of the Consolation to be produced, a satisfaction felt also in the ways Relihan mirrors Boethius himself in the thoroughness of his scholarship and the elegance of his exposition. No one who studies Boethius will be able to ignore this book." —Joseph Pucci, Brown University "Anyone who has been fascinated, intrigued, or perhaps puzzled by the meaning, structure, or argument of Boethius's Consolation of Philosophy will find Joel Relihan's new book a welcome addition to the study of this core text of the early medieval world whose influence extends to the present time. Relihan's study is a tour de force that belongs in the library of all those who appreciate Boethius's depth and subtlety. Fortune's wheel has indeed turned in the favor of those who wish to explore with Relihan the intricacies and brilliance of the Consolation." —Fr. John Fortin, O.S.B., Saint Anselm College

In *Ancient Menippean Satire*, Joel C. Relihan charts the history and development of this ancient genre. He demonstrates its unity as a Greco-Roman phenomenon, describes its different branches, and shows the continuity of the genre into late classical and early Christian times. He also discusses the theories of the genre set forth by Northrop Frye and Mikhail Bakhtin and presents a new and detailed definition that respects the particularities of classical texts. In chapters on the fragments and testimonia relevant to Menippus and Varro, Relihan shows the specific Greek origins of the genre and its transformation in Roman hands.
