THE AMADEUS BOOK OF THE VIOLIN CONSTRUCTION HISTORY AND MUSIC

Observes four centuries of pitch changes and their effect on instruments throughout this period, paying close attention to varying pitch levels used in Italy, France, and the Netherlands.

Journey into the Labyrinth details the forgotten role of the Earth and humanity, giving the reader new perspectives on the history of our species. Drawing from records from the hidden sacred libraries of Earth, lost civilizations and the wisdoms preserved by the indigenous peoples of the Earth, this book reveals a staggering older past than you may have ever imagined.

Borders and Freedom of Movement in the Holy Roman Empire tells the history of free movement in the Holy Roman Empire of the German Nation, one of the most fractured

landscapes in human history. The boundaries that divided its hundreds of territories make the Old Reich a uniquely valuable site for studying the ordering of movement. The focus is on safe-conduct, an institution that was common throughout the early modern world but became a key framework for negotiating free movement and its restriction in the Old Reich. The study shows that attempts to escort travellers, issue letters of passage, or to criminalize the use of "forbidden" roads served to transform rights of passage into excludable and fiscally exploitable goods. Mobile populations - from emperors to peasants - defied attempts to govern their mobility with actions ranging from formal protest to bloodshed. Newly designed maps show that restrictions upon moving goods and people were rarely concentrated at borders before the mid-eighteenth century, but unevenly distributed along roads and rivers. Luca Scholz uncovers intense intellectual debates around the rulers' right to interfere with freedom of movement. The Empire's political order guaranteed extensive transit rights, but claims of protection could also mask aggressive attempts of territorial expansion. Drawing on sources discovered in more than twenty archives and covering the period between the late sixteenth and the early nineteenth centuries, *Borders and Freedom of Movement in the Holy Roman Empire* offers a new perspective on the unstable relationship of political authority and human mobility in the heartlands of old-regime Europe.

How was the history of post-classical Rome and of the Church written in the Catholic Reformation? Historical texts composed in Rome at this time have been considered secondary to the city's significance for the history of art. *The Invention of Papal History* corrects this distorting emphasis and shows how historical writing became part of a comprehensive

formation of the image and self-perception of the papacy. By presenting and fully contextualising the path-breaking works of the Augustinian historian Onofrio Panvinio (1530-1568), Stefan Bauer shows what type of historical research was possible in the late Renaissance and the Catholic Reformation. Crucial questions were, for example: How were the pontiffs elected? How many popes had been puppets of emperors? Could any of the past machinations, schisms, and disorder in the history of the Church be admitted to the reading public? Historiography in this period by no means consisted entirely of commissioned works written for patrons; rather, a creative interplay existed between, on the one hand, the endeavours of authors to explore the past and, on the other hand, the constraints of ideology and censorship placed on them. *The Invention of Papal History* sheds new light on the changing priorities, mentalities, and cultural standards that flourished in the transition from the Renaissance to the Catholic Reformation.

The Brill Handbook of Freemasonry is a pioneering work that brings together, for the first time, leading scholars on Freemasonry—the largest, oldest, and most influential secret society in the world.
