Recounts the author's career as an award-winning recording engineer and highlights his work with Michael Jackson on his most influential albums.

Log 41 both observes the state of architecture today and devotes 114 pages to a special section called *Working Queer*, guest-edited by architect Jaffer Kolb. From Hans Tursack's commentary on "shape architecture" to Michael Young's valuation of parafiction as a critique of realism; from Lisa Hsieh's examination of modernology in Japan to Cynthia Davidson's conversation with Martino Stierli, Log 41 considers both history and the contemporary. In *Working Queer*, nineteen authors take a similar look at history and the contemporary in articles ranging from homo-fascism in early 20th-century aesthetics to trans gender bathroom typologies for today, as well as methods of work, materials, and mediation that can all be considered queer, or queering, in our pluralist, mediated world.

(Yamaha Products). Sound reinforcement is the use of audio amplification systems. This book is the first and only book of its kind to cover all aspects of designing and using such systems for public address and musical performance. The book features information on both the audio theory involved and the practical applications of that theory, explaining everything from microphones to loudspeakers. This revised edition features almost 40 new pages and is even easier to follow with the addition of an index and a simplified page and chapter numbering system. New topics covered include: MIDI, Synchronization, and an Appendix on Logarithms. 416 Pages.

This study analyses the historical development of South African cinema up to the book's original publication in 1988. It describes the films and comments on their relationship to South African realities, addressing all aspects of the industry, focusing on domestic production, but also discussing international film companies who use South Africa as a location. It explores tensions between English-language and Afrikaans-language films, and between films made for blacks and films made for whites. Going behind the scenes the author looks at the financial infrastructure, the marketing strategies, and the work habits of the film industry. He concludes with a discussion of independent filmmaking, the obstacles facing South Africans who want to make films with artistic and political integrity, and the possibilities of progress in the future. Includes comprehensive bibliography and filmography listing all feature films made in South Africa between 1910 and 1985 together with documentary films by South Africans, non-South Africans, and exiles about the country.
