New York, 1931. The manufacture and sale of alcoholic beverages is prohibited by law, but behind this prohibition, organized crime flourishes-so, too, do bank robbers, bootleggers, assassins, and homunculi. Some want money, some are chasing the secret to immortality, and others just want to have a really good time. You know what they say, though: You can't always get what you want.

Chop-Monster is a sequential jazz improvisation method by acclaimed jazz pianist and educator Shelly Berg that utilizes a "call-and-response" approach: students listen to a jazz idea, imitate it until it is internalized, and then "try it on their own." In Chop-Monster 1, students will hear and improvise to the Ima7, iimi7, and V7 chords in the key of B-flat, plus a basic blues progression. In Chop-Monster 2 students will hear and improvise to the ii-V-I progression in three keys (concert B-flat, E-flat, F).

Students learn to listen to sound more carefully. Although almost everybody plays with beautiful tone while tuning the violin, many press the bow and make a terrible sound when they start playing, especially double stops. The first exercises in this book are to practice playing the double stops with beautiful tone while listening to the resonance. There are exercises to shift the fingers between the G string and the E string, moving upward and downward in fifths. There are also many exercises to practice listening to the resonance of open strings.

For years, piano teachers remarked that Dennis Alexander's pieces were great for boys and suggested that he write a book of pieces with boys in mind. Drawing on his own teaching experiences, and recalling the kinds of pieces he would have liked to play at a similar age, he composed these engaging late elementary piano solos that incorporate strong rhythms, athletic leaps of the hands and big sounds. A gratifying collection for students who need a little extra motivation to practice!

This invaluable collection features rhythm drills and etudes and applies them to six full band arrangements. Some of the unique features include: an emphasis on musical passages containing a wide variety of rests, prep rhythm drills with suggestions for their use, etudes that can be played as a solo, or, when used with a companion etude, as a duet; an emphasis on changing eighth-note rhythms (5/8, 7/8 etc.) and a full band selection at the end of each unit reinforcing the newly learned rhythms and patterns.
