This advice applies to Scotland. There is always a contract between an employee and employer. You might not have anything in writing, but a contract still exists. This is because your agreement to work for your employer and your employer's agreement to pay you for your work forms a contract. Your employer has to give you a written statement within 2 months of you starting work.

Contracts of employment - Citizens Advice Scotland

The Scots law of contract has often, where no Scottish authority exists, made use of English case law as precedent. However, there are a number of basic elements of Scottish contract law that differ quite distinctly from the English, and where English authorities have been rejected. When it comes to the formation of contract, one of the four fundamental elements outlined above is absent in Scots law: consideration.

As a final point, it is important also to be aware of the different rules which govern when a timebar will arise meaning that a party loses their right to claim for a breach of contract. In Scotland an action for breach of contract will need to be raised within five years from the date of the breach, which is less time than may be available for raising a similar claim in England.

Scots law does not require consideration for a contract to be formed. The point is significant, too, when considering whether an existing contract has been varied. Scots law recognises a concept of 'unilateral promise', by which a party can bind itself to an obligation without any need for acceptance.

Contract Law in Scotland is an indispensable text for all students of contract law, and is a practical reference source for legal practitioners

A comprehensive work on the Scots law of contract, this text combines clear principles with practical guidance on how to draft clauses. It covers all aspects of the law, including pre-contract negotiations and the formation of a contract.

The law of contract forms the basis of our civil society. Without the law of contract we could not buy food, clothing or a place to live, nor could we book holidays, run a business or manage a football club. But contract law is complex and intricate, and disputes over contracts have led to a wealth of court cases over the years. This updated third edition gives you a clear and concise guide to the basics of the law of contract as it pertains to Scotland, from what a contract is to how they are formed, terminated and breached, and from third-party rights to cross-border contracts.

This volume tests the claim that, as combinations of Civil and Common Law influences, the mixed systems of contract law in Scotland and South Africa have anticipated the content of the Principles of European Contract Law (PECL) concluded and published in 2003 by the unofficial Commission on European Contract Law. Going further, it rigorously explores what the implications of a Europe-wide contract law would be. The current official moves towards a European contract law within the European Union make the critiques of PECL in this volume especially urgent and significant. With a European contract law nearer to reality than ever before, mere policy critiques are no longer enough. This book provides the essential technical and substantive assessments of PECL from the perspective of Scots and South African contract lawyers, and is offered to the European debate without prejudice as to the deeper policy questions. At the same time, this volume will inform Scots and South African lawyers about the substance of international developments in the field, and suggest ways to develop their still vigorous and vital national laws to remain in step with the needs of the present day.

This report, further to a Discussion Paper on Formation of Contract published in March 2012 (ISBN 9780108882630) undertaken as part of the Eighth Programme of Law Reform, looks at the specific difficulties of "execution in counterpart". The phrase describes the process by which parties to a formal document intended to have effect (e.g. as a contract) may be able to apply their respective signatures to it (execution) to make it binding without having to meet to do so or, indeed, having all to sign the same physical copy of the document. The main recommendations are: a document may be validly executed under Scots law by parties subscribing a counterpart of the document remotely from each other and then each delivering their subscribed counterpart to the other parties; delivery may be to a person nominated for the purpose rather than to the other parties; delivery of a traditional document may be effected by electronic means; a document takes effect either when each and every party has subscribed and delivered its counterpart, or at such later date as parties may agree; where all parties sign their counterpart in self-proving form, the document as a whole is self-proving; if desired, a "registration copy" of a document may be compiled by making up a single version which includes the signing pages from each of the counterparts; the reforms will not affect any document executed before they come into statutory force

This text provides a clear and coherent introduction to the principles of the Scottish law of contract. It explains the different types of contractual situations and looks at the formation, performance, and enforcement of contracts. The problems of cross-border and international contracts are also discussed. The text is doctrinally based and Scottish cases are used primarily for illustrative purposes. Typical contract clauses and situations are included and explained, and diagrams are used to illustrate complex situations.

Good faith is already a familiar concept in international commercial law and a recognised principle of substantive law in several major legal systems. In the United Kingdom, however, a role for good faith and, more fundamentally, the issue of whether or not there ought to be a general principle of good faith informing English and Scots contract and property law, are still matters for debate. This book, containing the papers delivered at the Symposium on Good Faith in Contract and Property Law held in Aberdeen University in October 1998, engages in that critical debate. While its central core reflects on good faith from the perspective of a mixed legal system (Scots Law), papers on good faith from an English and European perspective locate the debate, properly, within a broader jurisdictional context.

Provides a guide to the general principles of Scottish law relevant to construction contracts and the main provisions of the standard forms of construction contract used in Scotland including: the obligations of employers and contractors certification payment ending a construction contract remedies subcontracts collateral warranties insurance dispute resolution regulatory matters The new edition has been substantially updated and expanded to take account of the latest editions of the Scottish Standard Building Contracts and recent case law. Specific updates have been driven by the following changes to legislation and standard contracts Local Democracy Economic Development and Construction Act 2009 and the relative Scheme for Construction Contracts Arbitration (Scotland) Act 2010 Recognising the significant increase in use of NEC3 standard forms of contract, references to NEC3 provisions have been introduced throughout the relevant chapters so that each now covers the common law, the SBCC provisions and the NEC3 provisions. It also features new chapters on: litigation; competition; the Bribery Act 2010; and guarantees and bonds. From reviews of previous editions: "very approachable and readable" I would particularly recommend this book to non-legal construction professionals "Construction & Engineering Law" an informative textbook for the practitioner [a] significant contribution to knowledge "Arbitration" a highly competent textbook which would be of value for industry professionals with no legal background "Construction Law
