Decoding Language of God: Can A Scientist Really Be a ...

Decoding the Language of God is a geneticist's point-by-point refutation of Francis Collins' bestseller, The Language of God. In that book, Collins gave comfort to believers by arguing that a scientist can combine belief in science with belief in God. To say that Cunningham thinks that's nonsense would be an understatement.

In his bestselling book, The Language of God, Francis Collins--the scientist who led the National Institutes of Health's Human Genome Project--attempted to harmonize the findings of scientific research with Christian belief. In this response to Collins's work, fellow geneticist George C. Cunningham presents a point-by-point rebuttal of The Language of God, arguing that there is no scientifically acceptable evidence to support belief in a personal God and much that discredits it. Written with admirable clarity for the nonscientist, Decoding the Language of God covers much of the same ground addressed by Collins in his book: Do moral behavior, altruism, and similar moral standards across cultures indicate that humans are somehow in touch with a divine lawgiver, as Collins argues? Cunningham cites data from behavioral genetics that suggest a purely naturalistic explanation for morality. The existence of evil, both natural and human-caused, has always been a major stumbling block for religious apologists. Cunningham points out how Collins fails to adequately address this issue and the difficulty of reconciling belief in a good God with the existence of evil. Collins refers to the origin of the universe and anthropic coincidences as evidence of God as creator of all of reality. By contrast, Cunningham notes that there are naturalistic interpretations for the big bang and the fine-tuning of the universe, which adequately explain this evidence. Cunningham also devotes chapters to the unreliability of the Bible as a basis for belief; the conflict between naturalistic explanations of reality, which are anchored in scientific research, and supernatural interpretations, which are not; and the many difficulties in conceptualizing the origins of the universe in terms of a personal God. Unlike recent hostile attacks on religious belief, Cunningham's respectful, well-reasoned discussion will appeal to open-minded people across the whole spectrum of belief and unbelief. George C. Cunningham, MD, MPH (San Francisco, CA), now retired, is the former chief of the Genetic Disease Branch of the California State Department of Health Services. He has published more than 150 articles in scientific publications, including the New England Journal of Medicine, Lancet, the American Journal of Human Genetics, and Pediatrics.

In Decoding the Mind of God author O. M Kelly delves into the unconscious mind and discovers the secrets of the collective consciousness, showing how we can realize the potential of the human mind through belief in ourselves. The Laws of the universe are identical to the collective consciousness, they reveal an answer to every question we are capable of asking. We constantly receive these answers through the vibrations of the energy fields through our being, all without us knowing how to realign our intelligence with our unconscious mind. The truth remains hidden to us. Surprising as it may seem, the key to understanding ourselves lies in a mathematical language, which is the

make-up of the unconscious mind. Kelly explores this language through the texts and myths of myriad cultures and belief systems, notwithstanding the truth of the science behind the Egyptian Hieroglyphs and the stories collected in the Bible. As we read this volume we realize that all of these stories are connected to our own story within. Kelly ' s perceptions of the order of higher consciousness are framed by stories from her experiences of personal discovery and over twenty years of researching, lecturing and teaching all around the world. Once these codes are unveiled, we earn our freedom where we can release the fear in which humanity habitually traps itself, creating our accidents, diseases, why we die, right up to explaining extra terrestrial intelligence. This book exposes the secret codes of the universal language that will help us achieve the divine unity with the universe and ourselves.

Decoding ' The God ' and ' The Religion ' is written in a format that is easy to read and understand, whether the reader is a 13-15 years old or 50-60 years old, a 10th grader or a post graduate. It caters to everyone in a simplified manner with the idea of not asking one to ' believe ' , but to understand, feel, introspect, explore and know the answers. Each line is written matter-of-factly, which will make readers feel like this is something they already knew, they already had inside them and will hopefully encourage you to look within. Evolution plays a huge part here in this era, so to help you enjoy the experience of your individual journey into the Divinity, I do not need to make you wear the coloured spectacles of belief and dogmas. In today ' s time, there already is so much information, and awareness, so many studies on physical and medical education, which are progressing every passing day. Social and judicial systems also get upgraded in most democratic countries, so I do not need to write a lot about it; that would be like rewriting an existing software as religion in a book or this series of books. All I need to do here is remove the coloured lens of belief and dogma, and open all eyes to understanding, giving accessibility to upgrades and updates of existing software, with the right intent, taking the human brain as the hardware. I have refrained from taking the name of any religion, sect or belief, or of their respective preachers, so that opportunists do not mislead people from the right context and intent of this book for the sake of their greed, lust, personal gains and agendas.

The ultimate source text of Enochian Magic never before available in book form • Contains the actual and complete Tables of Enoch given to Dr. John Dee by the Angels • Explains the difference between Dee ' s Tables of Enoch and the apocryphal Book of Enoch • Includes directions for powerful magic rituals and meditations using these tables • Presents a reconstruction of the possible 49th missing Table of Enoch Originally considered a vital part of inspirational literature used by the early church, the Book of Enoch never made it into the cannon or accepted books of the Old Testament because of its strange and mysterious content about Enoch ' s experiences in the higher realms, or heavens. The real Book of Enoch, which is a set of almost 100 mystical tables, was given again to humankind in the 1580s, when it was conveyed directly by angels to Dr. John Dee, a 16th-century mathematician, scientist, occultist, and the astrologer of Queen Elizabeth I. Called " the most important book ever given to man by God " by Dee ' s angelic messengers, the Book (or Tables) of Enoch is said to hold all the secrets of heaven and earth and the physical and spiritual realms. Decoding the Enochian Secrets reproduces for the first time ever the exact and complete copy of these tables, which are housed in the British Library. The tables are written in the handwriting of Dr. Dee and Edward Kelly, Dee ' s assistant and sayer. The tables also include the phonetic pronunciations, written by Dee in the margins, of all the magical Enochian Calls. Covering the history of this Book or Tables of Enoch, John DeSalvo explains the difference between these tables and the apocryphal Book of Enoch and examines how later magicians such as Aleister Crowley used them. Including Enochian Magic

Meditations and rituals, Decoding the Enochian Secrets presents the source text to the most powerful form of magic known to mankind.

Dr Francis S. Collins, head of the Human Genome Project, is one of the world's leading scientists, working at the cutting edge of the study of DNA, the code of life. Yet he is also a man of unshakable faith in God. How does he reconcile the seemingly unreconcilable? In THE LANGUAGE OF GOD he explains his own journey from atheism to faith, and then takes the reader on a stunning tour of modern science to show that physics, chemistry and biology -- indeed, reason itself -- are not incompatible with belief. His book is essential reading for anyone who wonders about the deepest questions of all: why are we here? How did we get here? And what does life mean?

A thorough and hard-hitting critique that is a must read for anyone interested in the interaction between religion and science. It has become the prevalent view among sociologists, historians, and some theistic scientists that religion and science have never been in serious conflict. Some even claim that Christianity was responsible for the development of science. In a sweeping historical survey that begins with ancient Greek science and proceeds through the Renaissance and Enlightenment to contemporary advances in physics and cosmology, Stenger makes a convincing case that not only is this conclusion false, but Christianity actually held back the progress of science for one thousand years. It is significant, he notes, that the scientific revolution of the seventeenth century occurred only after the revolts against established ecclesiastic authorities in the Renaissance and Reformation opened up new avenues of thought. The author goes on to detail how religion and science are fundamentally incompatible in several areas: the origin of the universe and its physical parameters, the origin of complexity, holism versus reductionism, the nature of mind and consciousness, and the source of morality. In the end, Stenger is most troubled by the negative influence that organized religion often exerts on politics and society. He points out antiscientific attitudes embedded in popular religion that are being used to suppress scientific results on issues of global importance, such as overpopulation and environmental degradation. When religion fosters disrespect for science, it threatens the generations of humanity that will follow ours.

Magnificently illustrated throughout, and with a six-color gold-foil cover, this remarkable book provides an all-encompassing survey of the literature, painting, sculpture, architecture, and decorative arts of the Renaissance.

YOU ARE A LIVING MAGNET! You are where you are today because of the Law of Attraction. The Bible teaches us in Proverbs 23:7 that what a person allows to be part of their dominant thoughts then becomes who they are. Thoughts become things! Let Rich Cavaness and Leo Schreven explain for you how The Secret applies to your life from the Creator God's perspective. Until now there has not been a book that has offered all the pieces to the puzzle - now Decoding The Secret addresses the Law of Attraction from a mental, physical, emotional, financial, social and most importantly, from a spiritual standpoint. THIS BOOK WILL ADDRESS THESE IMPORTANT QUESTIONS: * Why do things always seem to go wrong for you? * Why does money seem to avoid you like the plague? * Why is your life a living testament of your dominant thoughts? * How does God work with the Law of Attraction? * Why does your lack of faith and belief prevent God's blessing? * How can you visualize and focus turn dreams into reality? * Why can your tongue be either a miracle or a curse? Using an open-minded
