Description Ecotourism is the result of increasing interest amongst consumers in developed countries in exploring the natural world as an alternative to more conventional holidays, along with a desire to reduce the environmental and cultural impact of their activities. It is, therefore, a relatively new sector of the tourism industry.

Ecotourism in the Less Developed World by Professor David ...

Ecotourism and its effects, in all parts of the Developing World, are defined, described and analysed. Comprising 9 chapters, the first 3 chapters set the industry context and geographical scope of the book. This is followed by country case studies on Costa Rica, Kenya, Nepal, and Thailand, and a chapter on the Caribbean and South Pacific. In the final chapter, the common themes and patterns...

Ecotourism in the Less Developed World by Weaver ...

Ecotourism in Costa Rica is one of the key activities of the tourism industry in the country. By the early 1990s, Costa Rica became known as the poster child of ecotourism. The country is among many developing nations that look to ecotourism as a way of cashing in on the growing demand for this popular trend of travel. Ecotourism draws many tourists to visit the extensive national parks and protected areas around the country. Costa Rica was a pioneer in this type of tourism, and the country is r

Ecotourism in the Less Developed World : Professor David B ...

An overview of alternative tourism (AT) and ecotourism within the less developed world is provided as a prelude to consideration of several case studies in the remainder of the book. The first section examines the evolution and extent of sociocultural AT in the region, since this form of tourism is often seen as complementary to ecotourism and therefore possibly an influence in the evolution of...

By defining and analyzing ecotourism in the less developed countries, and its effects, in all parts of the world, this book sets the broader industry in context and includes country case studies, and common themes and patterns which emerge.

Many less developed countries are expanding their tourism industries and these are seen to be crucial to their economic development. Yet such activities can also create social, cultural and environmental problems. This book provides a review of many of the key issues involved in tourism in developing countries and presents a range of case studies. These are interpreted from a perspective of the sociology and anthropology of development. Case study chapters are presented from Africa, Asia, the Caribbean, Latin America and Oceania. The book provides essential reading for advanced students and researchers in tourism and development studies.

Many less developed countries are expanding their tourism industries and these are seen to be crucial to their economic development. Yet such activities can also create social, cultural and environmental problems. These are interpreted from a perspective of the sociology and anthropology of development. Case study chapters are presented from Africa, Asia, the Caribbean, Latin America and Oceania. The book provides essential reading for advanced students and researchers in tourism and development studies.

"This volume reviews indigenous ecotourism as a special type of nature-based tourism and examines the key principles of conservation and community benefits from indigenous-owned and operated ecotourism businesses or joint ventures. It compares indigenous ecotourism in developed and developing countries and provides global case studies of indigenous ecotourism projects in the Pacific Islands, Africa, Latin America and Southeast Asia. The book analyses key factors and constraints for sustainable development of Indigenous ecotourism and explores the growing links between biodiversity conservation, ecotourism and indigenous rights. It will appeal to practitioners, researchers and students in ecotourism and sustainable tourism, indigenous studies, conservation, natural resource management and community development."--BOOK JACKET.

Intended as a guide for wildlife managers and ecotourism operators, as well as interested ecotourists, this book addresses the biological principles governing how ecotourism affects wildlife. The introductory chapters focus on four key responses to human visitation-behavioral, physiological, ecological, and evolutionary. Readers will discover ecotourism's effects on biodiversity in connection with various industries that are habitat or taxonomically specific: fish tourism (including both freshwater and marine), marine mammal tourism, the huge industry centered on terrestrial animals, and the well-studied industry of penguin tourism. Given that the costs and benefits of ecotourism cannot be meaningfully assessed without understanding the human context, particular attention is given to how ecotourism has been used as part of community development. In closing, the book synthesizes the current state of knowledge regarding best practices for reducing human impacts on wildlife. The final chapter highlights key research questions that must be addressed to provide more evidence-based guidelines and policy.

Tourism has increasingly become a vital element in the economic development of the Indian Ocean region. This volume brings together leading tourism and economics experts from the region to discuss the wide range of problems and issues raised by the increasing significance of tourism such as: tourism and development; dimensions of and assault on rural and urban poverty; empowerment of women; women's property rights; access of the rural poor to services and resources; political and economic impediments to human resources development; management of energy and environmental resources; and electronic commerce and development. These issues and proposed policies are examined theoretically in the first section of this book, with comparative empirical case studies from Australia, Papua New Guinea, Botswana, Hong Kong, Singapore, India, the Maldives, Mauritius, the Seychelles, China and South Africa illustrating these arguments in the second section. A conclusion sums up the problems found in current policy and practice and puts forward innovative proposals and prospects for tourism and development in the region.

Throughout the world, local, natural wonders are being overrun by hordes of destination seekers intent on capturing nature's majesty. Though the flood of tourists brings economic stability to these regions, the environmental and local community concerns must be taken into consideration. Ecotourism and Community Intervention: Emerging Research and Opportunities examines community intervention strategies and their causal relationship with destination sustainability and destination quality. The book calls for more proactive measures to enhance destination sustainability through ecotourism initiatives in destinations across the globe. The content within this publication examines global business, mass tourism, and resource management. It is designed for conservationists, environmentalists, tour developers, travel agents, policymakers, administrators, managers, and university students.

Papers presented at a seminar held at Itanagar during 8-9 February 2005.

This critical review of sustainable tourism, from its beginnings in the late 1980s to the present, examines the pressing challenges posed by the effects of global warming and the persistence of deep poverty and social unrest in many regions. David Weaver explores the convergence of mass and 'alternative' tourism as a dominant theme. Originally perceived as two incompatible forms of tourism, they are positioned in this book through enlightened mass tourism as unified components of a single global 'tourisystem' with the power to achieve sustainable tourism.
