DIN Flange/EN 1092-1 Flanges. Germany and several other countries in the European Union mainly install flanges according to standard DIN EN 1092-1 (forged Stainless or Steel Flanges). Similar to the ASME flange standard, the EN 1092-1 standard has the basic flange forms, such as weld neck flange, blind flange, lapped flange, threaded Flange ...

Weld Neck Flanges ,ASEM B16.5 Welding neck flange,DIN Weld ...

Similar to the ASME flange standard, the EN 1092-1 standard has the basic flange forms, such as weld neck flange, blind flange, lapped flange, threaded Flange (Thread ISO7-1 instead of NPT), weld on collar, pressed collars, and adapter flange such as flange coupling GD pressfittings.

"Pants with close crotch," "polyandry," and "a tiger in a cage" — these enigmatic terms are frequently used by Chinese economists and policy-makers to figuratively describe certain significant financial events in the history of New China. Major Issues and Policies in China's Financial Reform is a 4-volume guide to these kinds of events. ? With the economic transformation of late 1980s as a turning point, this series provides an in-depth examination of 28 key financial policies and issues in China over a 60-year timespan. The series combines vivid stories and theoretical analysis to explain the historical background of these financial reforms, including such concepts as replacing the fiscal appropriation of investment funds by bank loans, the replacement of profit delivery by taxes, and debt for equity swaps. ? ? The series also offers evaluations of the subsequent impacts of these policies on China's economic development. Major Issues and Policies in China's Financial Reform uses a review of history to provide a basis for policy recommendations, innovations, and future fiscal and financial reforms In China.
