This publication reflects the results of the Ethiopian education reform as well as the exceptional efforts that multiethnic Ethiopia undertakes in order to cope with the challenges arising from the population explosion. More than 55 per cent of the 77 million Ethiopians are under the age of 18 years. The great social and political changes started in Ethiopia at the beginning of the 1990s have resulted in the substitution of the educational system based on Amharic and English by one which uses a multilingual approach. According to the Ministry of Education 22 out of the 84 languages spoken in Ethiopia are now used as media of instruction in primary schools. The book presents the lectures delivered at the workshop "On the Results of the Reform in Ethiopia's Language and Education Policy" held at Addis Ababa University in April 2006 by Ethiopian education experts and a German research team. Their contribution has facilitated a subsumption into the historical context and has given insight into the analyses of the use of 8 Ethiopian languages in primary schools in different regions of the country.

After being immersed in almost three decades of civil conflict, the prevailing peace and political stability in Ethiopia allowed its government to focus on rebuilding its economy. As an integral part of this undertaking, the Federal Democratic Republic of Ethiopia is seeking to overhaul the landscape of human capital development in the country. This report discusses the situation and trends in education, health, nutrition, and population. It also examines the barriers to improvement from the points of view of Ethiopian households and public and private suppliers of services. It also attempts to identify the means by which the government can use public resources more effectively.
