hardwired in us: Humans instinctively focus on problems. Over millennia, our very survival relied on our ability to be alert to any potential dangers that could threaten our existence. But today this negativity bias significantly limits our potential and increases stress, pressure, and underperformance. The one characteristic all phenomenally successful people share is mental toughness. Mentally tough people are better at making decisions more quickly and with better results. They possess the uncanny ability to control what goes on between their ears. Instead of allowing their minds to focus on their problems when adversity strikes, the most successful people have learned to direct their thoughts in a systematic manner that produces positive emotions and productive actions: they have a Relentless Solution Focus. In this book, top performance coach Dr. Jason Selk—former Director of Mental Training for the World Series champions St. Louis Cardinals—and his colleague Dr. Ellen Reed provide the insight, tools, and proven step-by-step framework for you to do the same. When you have Relentless Solution Focus, you think better. Your decisions garner positive results. You take action and follow through—every time. And when you do get off track, you get back on with less effort and less drama. Weakness shrinks and strength grows, creating confidence and momentum, taking you and your team to higher levels of performance and achievement.

Online advertising, also called online marketing or Internet advertising, is a form of marketing and advertising which uses the Internet to deliver promotional marketing messages to consumers. It includes email marketing, search engine marketing (SEM), social media marketing, many types of display advertising (including web banner advertising), and mobile advertising. Like other advertising media, online advertising frequently involves both a publisher, who integrates advertisements into its online content, and an advertiser, who provides the advertisements to be displayed on the publisher's content. Other potential participants include advertising agencies who help generate and place the ad copy, an ad server who technologically delivers the ad and tracks statistics, and advertising affiliates who do independent promotional work for the advertiser. Internet marketing can also be broken down into more specialized areas such as Web marketing, email marketing and social media marketing: 1) Web marketing includes e-commerce Web sites, affiliate marketing Web sites, promotional or informative Web sites, online advertising on search engines, and organic search engine results via search engine optimization (SEO). 2) Email marketing involves both advertising and promotional marketing efforts via e-mail messages to current and prospective customers. 3) Social media marketing involves both advertising and marketing (including viral marketing) efforts via social networking sites like Facebook, Twitter, YouTube and Digg.
