How do the rich get rich? An updated edition of the "remarkable" New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as "rich" are actually a tiny minority of America's truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America's rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. "Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today's earn-and-consume culture." —Library Journal

In *Information Rules*, authors Shapiro and Varian reveal that many classic economic concepts can provide the insight and understanding necessary to succeed in the information age. They argue that if managers seriously want to develop effective strategies for competing in the new economy, they must understand the fundamental economics of information technology. Whether information takes the form of software code or recorded music, is published in a book or magazine, or even posted on a website, managers must know how to evaluate the consequences of pricing, protecting, and planning new versions of information
