Margaret Anna Cusack (1829 - 1899) was internationally famous as The Nun of Kenmare. She was an Anglican nun who converted to Roman Catholicism and founded an order of nuns called Sisters of St. Joseph of Peace. She was a dogged and compassionate champion of the underprivileged and a pioneering spirit in the cause of equal rights for women. Due to her public profile, she was in continuing difficulties with Church authorities and reverted to Protestantism in 1889. Since 1978, Paddy McMahon has been aware of Margaret communicating with him as a spirit guide. Early in July 1998 she intimated that she wished to collaborate with him in writing a book. This book is a record of the dialogue between them. In a wide-ranging exploration of the life in all its aspects, she says: "I want to shout a big YES to life, to the death of death, if I may put it like that, so that anybody and everybody can say - 'I know my body is going to die, but I know, too, that there's nothing to fear in that - it's a celebration of continuing transformation in life'. I want to go into detail about how I express myself in my present state and what life in spirit, generally, is like..."

What is the point? What is the purpose of life? Why must I suffer the stress, and anxiety that comes with it? Why does it all seem so hard and so unfair? If you have asked yourself any of these questions, then you have found the book you are looking for. There are answers to all of these questions and Anderson Silver has compiled teachings from Stoicism and other schools of thought in Your User's Manual. This refreshing collection not only gives the reader much sought after answers, but also provides the tools for finding purpose, and living an anxiety-free life in the modern world. Meant as a light read that the reader can come back to and meditate on periodically, Anderson has done a wonderful job of condensing fundamental teachings, making Your User's Manual a straightforward read in answering life's most pressing questions and recognizing what is truly important.

This wide-ranging and inspiring volume of essays explores Nietzsche's philosophy of the free spirit. Nietzsche begins to articulate his philosophy of the free spirit in 1878 and it results in his most congenial books, including Human, all too Human, Dawn (or Daybreak), and The Gay Science. It is one of the most neglected aspects of Nietzsche's corpus, yet crucially important to an understanding of his work. Written by leading Nietzsche scholars from Europe and North America, the essays in this book explore topics such as: the kind of freedom practiced by the free spirit; the free spirit's relation to truth; the play between laughter and seriousness in the free spirit period texts; integrity and the free spirit; health and the free spirit; the free spirit and cosmopolitanism; and the figure of the free spirit in Nietzsche's later writings. This book fills a significant gap in the available literature and will set the agenda for future research in Nietzsche Studies.

TuneCrack stands for: Crack the tuning problem - Learn to tune instruments precisely. The importance of tuning is often underestimated. However, tuning is a necessary step for every performance. TuneCrack has exercises to improve your listening skill and your pitch transfer skill. Your listening skill is trained with the Precision Listening Method. Your task is to solve ever more challenging questions: until a precision to the cent. Your transfer skill is trained with the Pitch Keeper Method. First, the program introduces you to your personal Absolute Pitch Point. With appropriate exercises and feedback you learn how to take over a pitch and keep the sound in your mind for an ever-lengthier time period. Transferring a pitch and keeping it in your mind is an important step in understanding the musical center of a piece. Since humans can only express pitch by singing, the program listens to you and gives you feedback based on your singing: a colored pitch line shows, if you are too low, too high or on target. The program tracks your progress and lets you see the statistics in graphical form. Thus, your weak and strong points get visible. Eliminate weak points by training. Build upon and extend your strong points. With your strong points start building an absolute pitch repertoire.
