2 B R 0 2 B is a science fiction short story by Kurt Vonnegut. The title is pronounced "2 B R naught 2 B", referencing the famous phrase "to be, or not to be" from William Shakespeare's Hamlet, Prince of Denmark. In this story, the title refers to the telephone number one dials to schedule an assisted suicide with the Federal Bureau of Termination. Vonnegut's 1965 novel God Bless You, Mr. Rosewater describes a story by this name, attributing it to his recurring character Kilgore Trout, although the plot summary given is closer in nature to the eponymous tale from his short-story collection Welcome to the Monkey House. The setting is a society in which aging has been cured, individuals have indefinite lifespans, and population control is used to limit the population of the United States to forty million. This is maintained through a combination of infanticide and government-assisted suicide - in short, in order for someone to be born, someone must first volunteer to die. As a result, births are few and far between, and deaths occur primarily by accident.f

Overnight, Reverend Hooper has taken to wearing a translucent, but dark veil. Believing the veil to be symbolic of his sin, Hooper refuses to remove it, and wears it throughout the rest of his life. Like the majority of Hawthorne's stories, "The Minister's Black Veil" is an allegorical criticism of Puritan beliefs. Hawthorne may have been inspired by clergyman Joseph Moody, who accidentally killed his friend and, in response, wore a black veil until his own death. The advanced technology of a house first pleases then increasingly terrifies its occupants.

Big Brother gets up close and personal. Do you know about RFID (Radio Frequency Identification)? Well, you should, because in just a few short years, this explosive new technology could tail marketers, criminals, and government snoops everything about you. Welcome to the world of spychips, where tiny computer chips smaller than a grain of sand will trace everyday objects?and even people?keeping tabs on everything you own and everywhere you go. In this startling, eye-opening book, you'll learn how powerful corporations are planning a future where: Strangers will be able to scan the contents of your purse or briefcase from across a room. Stores will change prices as you approach--squeezing extra profits out of bargain shoppers and the poor. The contents of your refrigerator and medicine cabinet will be remotely monitored. Floors, doorways, ceiling tiles, and even picture frames will spy on you?leaving virtually no place to hide. microchip implants will track your every move?and even broadcast your conversations remotely or electroshock you if you step out of line. This is no conspiracy theory. Hundreds of millions of dollars have already been invested in what global corporations and the government are calling "the hottest new technology since the bar code." Unless we stop it now, RFID could strip away our last shreds of privacy and usher in a nightmare world of total surveillance?to keep us all on Big Brother's very short leash. What critics are saying about Spychips, the book: Spychips "make[s] a stunningly powerful argument against plans for RFID being mapped out by government agencies, retail and manufacturing companies." ?Evan Schuman, CIO Insight "The privacy movement needs a book. I nominate Spychips." ?Marc Rotenberg, EPIC "Brilliantly written; so scary and depressing I want to put it down, so full of fascinating vignettes and facts that I can't put it down." ?Author Claire Wolfe Spychips "makes a very persuasive case that some of America's biggest companies want to embed tracking technology into virtually everything we own, and then study our usage patterns 24 hours a day. It's a truly creepy book and well worth reading." ?Hiawatha Bray, Boston Globe "You REALLY want to read this book." ?Laissez Faire
