As the owner of Beyond Chiropractic, Dr. Lash is a Chiropractor as well as a Certified Functional Medicine Practitioner. She is a Conshohocken native who enthusiastically started a wellness center in her hometown to serve the people of the greater Philadelphia area.

When his infant son s life was threatened by a medical condition that

the hospital physicians couldn't diagnose, chiropractor Dr. Scott Paton took matters into his own hands. Taking a chance, he decided to apply a gentle chiropractic technique that ended up restoring his baby's health. But unfortunately, these treatments are dismissed by those who reject unconventional medicine. The US ranks a distant (and disgraceful) thirty-seventh in healthcare, according to the World Health Organization. The reason? Western medical practices focus on prescription medications that mask symptoms rather than address the illness. This system is dangerously eroding our health and putting children at serious risk...but Dr. Paton has an alternative solution. In his new book, *Health Beyond Medicine: A Chiropractic Miracle*, Dr. Paton details the five essential factors for health that, if met, can help our bodies heal themselves without the use of medications. Unlike today's healthcare, which too often masks the symptoms of disease with drugs, chiropractors offer medical alternatives that target the root causes of sickness by strengthening our own immune systems to fight disease. It is no wonder that while America spends the second highest amount worldwide on healthcare, says Dr. Paton, we rank only 24th on the list of longest life expectancy, below nations such as Andorra and Singapore! Dr. Paton believes it is time we stop swallowing the lies and the pills and start exploring successful, natural means of treatment. Now is the time to take back control of

our own lives and to do the things that will guarantee a healthy, happy and secure future, he says. After all, true health comes from inside the body not from inside a bottle. Explores how Vicious Cycle Disorders (VCD) can be identified and eliminated with a Matrix Assessment Profile (MAP).

Good health is the natural state of the human body. People do not get sick because they are low on pharmaceutical drugs or vaccines. A lack of proper nutrition, a buildup of toxins inside the body, and disturbances in the body's internal communication systems are typical underlying causes of illness. But doctors and patients alike are trapped in our allopathic medical system, which promotes ever more medications and invasive surgical procedures to solve every single health problem. Drugs and surgery can temporarily reduce or hide symptoms, but they do little to help the body heal. Pharmaceutical-

based medicine is now a leading cause of premature death and disability in the United States, which makes avoiding unnecessary medical intervention an important strategy for keeping families healthy today. The good news is that debilitating and chronic health disorders can often be resolved with embarrassingly simple solutions that correct imbalances in the body and restore innate healing. Darrel Crain is a doctor of chiropractic, natural-health researcher, and health-freedom advocate. His mission is to share a vital secret: Natural, low-risk nutritional interventions and healthy life habits today can prevent the need for high-risk drugs and surgery now and in the future. Dr. Crain views illness as a sign of imbalance in the body, a wakeup call for people to take control of their own physical, emotional, and spiritual health as well as that of their children. He rejects the notion that life is a medical condition. He believes health is won not through battling disease, but by building up the body's natural healing powers. In private practice Dr. Crain helps pregnant moms, newborns, and children of all ages with drugless, hands-on chiropractic care that supports the body's innate healing wisdom. Dr. Crain encourages readers to educate themselves about natural healing and question every single medical intervention-before the fact, not after.

Explores the web of legal, ethical, and regulatory issues surrounding the integration of complementary and alternative medicine into clinical care

Successful healing has been wished and hoped for - until now. Dr Carol A Wilson offers a new biopsychosocial-spiritual perspective on disease illness health and healing. In an approach to healing that includes the removal of eight common barriers to healing and Complementary and Alternative Medicine (CAM) Healing Power Beyond Medicine inspires and provides tools that produce efficacious and positive outcomes.

Can Evidence Based Medicine (EBM) and Complementary and Alternative Medicine (CAM) find common ground? A distinguished historian of medicine, John S. Haller Jr., explores the epistemological foundations of EBM and the challenges these conceptual tools present for both conventional and alternative therapies. As he explores a possible reconciliation between their conflicting approaches, Haller maintains a healthy, scientific skepticism yet finds promise in select complementary and alternative (CAM) therapies. Haller elucidates recent research on the placebo effect and shows how a new engagement between EBM and CAM might lead to a more productive

medical practice that includes both the objectivity of evidence-based medicine and the subjective truth of the physician-patient relationship. Haller's book tours key topics in the standoff between EBM and CAM: how and why the double blinded, randomized clinical trial (RCT) came to be considered the gold standard in modern medicine; the challenge of postmodern medicine as it counters the positivism of evidence-based medicine; and the politics of modern CAM and the rise of the National Center for Complementary and Alternative Medicine. He conducts an in-depth case study of homeopathy, explaining why it has emerged as a poster-child for CAM, and assesses CAM's popularity despite its poor performance in clinical trials. Haller concludes with hope, showing how new experimental protocols might tease out the evidentiary basis for the placebo effect and establish a foundation for some reconciliation between EBM and CAM.

An exploration of the new wave of science and how it relates to the models for health and medicine in the 21st century.

Deborah Z. Bain, M.D., has charted a course that leads you through her years of pain and suffering while putting her life in the hands of a medical system that has long been broken. In her brokenness and frustration, filled with toxins and the affects of corrective surgery, Doctor Bain set out to find real answers that would bring her ravaged body back to health. HOW THE CHIROPRACTOR SAVED MY LIFE, is the amazing story of faith in God, the harmful effects that can be done by the very drugs used to treat us, and the awesome power of the human body to heal. Doctor Bain is a practicing Pediatrician in Frisco, Texas.

There is healing "beyond medicine?" Betty Dye, housewife, mother of several children—and a psychic healer. In 1970, she treated James DePass who was suffering from nausea and stomach pains. Mrs. Dye went into a trance, diagnosed the trouble and put her hands on the patient. His pain vanished. Cecile Diamond, age 14, suffered from inflammation of the brain. Rabbi Solomon Friedlander, a spiritual

healer, placed an amulet in her hand and prayed. The next day she was able to leave the hospital. These cases and the many more in Beyond Medicine are all documented, frequently by the use of medical statements taken before and after psychic healing has taken place. Beyond Medicine probes into a relatively unknown and little-explored area of human activity—healing—and, cutting into the cant of the medical establishment, gives credibility to a group of remarkable individuals.
