El Manual de Histología General surgió como una respuesta a la necesidad de un texto actualizado para la asignatura Histología General que respondiera al plan de estudios actual para la carrera de Medicina Veterinaria. Los contenidos se desarrollaron en tres partes: la primera donde se estudia la estructura de la célula animal relacionada con las principales funciones que desarrolla; la segunda incluye el desarrollo embrionario de

Brown mamíferos, aves y peces, y la tercera que estudia el origen embriológico, la microestructura y las funciones de los tejidos básicos. Las imágenes histológicas utilizadas han sido tomadas del archivo de micropreparaciones del Laboratorio de Histología de la Facultad de Ciencias Agropecuarias de la Universidad de Camagüey, los esquemas e ilustraciones fueron tomadas de diferentes fuentes y trabajadas por los autores con la cooperación de los estudiantes Robert González Chávez (Medicina Veterinaria) y Alejandro Bertot Garay (Arquitectura).

The leading veterinary histology text returns with a fully updated sixth edition. Written in a concise, easy-to-understand that's a pleasure to read, this new edition continues the student-friendly tradition originated by Dr. Dellman, presenting the basics of histology including cytology and microscopic anatomy. The Sixth Edition focuses on the most current knowledge of cell, tissue and organ structure and function. All information has been fully

Brown revised and updated by the authors, both experts in their fields. Written with first year veterinary students in mind, it is also an important resource for veterinarians, graduate students, and others who require information on animal tissue structure and function. Highlights of the Sixth Edition include: New images and line drawings have been added to enhance the student's understanding of concepts. Two-page insert contains full-color histology images. Comprehensive listings of suggested readings at the end of each chapter encourage further study. The
