How do humanists speak for and from the humanities in an academy which values them less and less and market-driven approaches more and more? Jeffrey R. Di Leo provides a thorough critique of the higher education crisis and a set of practical and reasonable remedies for shaping the study and practice of the humanities in the academy of the future.

Is the comedy of Stephen Colbert simply fun or is it powerful political satire? Does it entertain viewers or does it empower them? Or does it teach us that in today's media-saturated world those binaries make no sense? Colbert's America claims that Colbert's satire fosters critical thinking about social issues, encourages active citizenship, and entertains the viewer - all at the same time. The first book to cover the various themes and features of The Colbert Report, Colbert's America offers readers insight into the powerful ways that Colbert's comedy challenges the cult of ignorance that has threatened meaningful public debate and social dialogue since 9/11.

Feminist Theory in Pursuit of the Public argues that feminism needs to develop a theory of the public. It responds to a moment when feminism's impetus to reconstitute the private sphere left a huge gap in its political thinking on the public. This inattention to the public is particularly worrisome now when the nation-state and its publics seem to have diminishing power and compromised democratic agency. The waning of power in the public sphere diminishes the influence that citizens can have in deciding on the conditions of life, and therefore minimizes the changes that feminists can envision or enact in the social field to work towards equality, access, deliberation, participation, just distribution, rights, and authority for women.

An exploration of how the nonrational aspects of schooling, especially ritual(s), have been harnessed to construct a commonsense which serves the interests of transnational corporations, leaving those educators committed to democracy to develop a new pedagogy that rejects the technical solutions that present reforms demand.

What are the ties that bind the 'good youth citizen' and the youth activist in the twenty-first century? Contemporary young people are encouraged - through education and other cultural sites - to 'save the world' via community projects that resemble activism, yet increasingly risk arrest for public acts of dissent. Citizen Youth goes to the heart of these contradictions, exploring the dilemmas and cultural dynamics of being young and politically engaged. Through an ethnographic study of young people working on activist causes across the three largest urban centres in one of the wealthiest nations in the world (Toronto, Montreal, and Vancouver, Canada), this book draws on Bourdieusian cultural sociology, feminist theories of agency, phenomenology, and political theories of the state and neoliberalism to understand what it means to be a certain kind of youth citizen in the twenty-first century. Accessibly written yet theoretically engaged, the book will be of interest to individuals both within academia and in the wider world of social movements and youth engagement.

Academic freedom has been a principle that undergirds the university since 1915. Beyond this, it also protects a spirit of free inquiry essential to a democratic society. But in the post-9/11 present, the basic principles of academic freedom have been deeply challenged. There have been many startling instances where the rhetoric of national security and terror, corporate interests, and privatization have cast a pall over the terrain of academic freedom. In the post-9/11 university, professors face job loss or tenure denial for speaking against state power, while their students pay more tuition and fall deeper in debt. This timely collection features an impressive assembly of the nation s leading intellectuals, addressing some of the most urgent issues facing higher education in the United States today. Spanning a wide array of disciplinary fields, Academic Freedom in the Post-9/11 Era seeks to intervene on the economic and political crises that are compromising the future of our educational institutions.

This book challenges educators to be agents of change, to take history into their own hands, and to make social justice central to the educational endeavor. Paraskeva embraces a pedagogy of hope championed by Paulo Freire where people become conscious of their capacity to intervene in the world to make it less discriminatory and more humane.
