Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

International Harvester Trucks: The Complete History tells the complete story of the light, medium, and heavy-duty trucks, vans, and station wagons built by International Harvester during over a century of production.

DIVA photographic chronology of some of the fastest, most stylish, and most individualized bikes in motorcycling history./divDIV /divDIVOriginally used as a slur against riders who used hopped-up motorcycles to travel from one transport café to another, "café racer" describes a bike genre that first became popular in 1960s British rocker subculture--although the motorcycles were also common in Italy, France, and other European countries. The rebellious rock-and-roll counterculture is what first inspired these fast, personalized, and distinctive bikes, with their owners often racing down public roads in excess of 100 miles per hour ("ton up," in British slang), leading to their public branding as "ton-up boys." Café Racers traces café racer motorcycles from their origins in the mid-twentieth century all the way into modern times, where the style has made a recent comeback in North America and Europe alike, through the museum-quality portraiture of top motorcycle photographer Michael Lichter and the text of motorcycle culture expert Paul d'Orléans. Chronologically illustrated with fascinating historical photography, the book travels through the numerous ever-morphing and unique eras of these nimble, lean, light, and head-turning machines. Café Racers visually celebrates a motorcycle riding culture as complex as the vast array of bikes within it./div

Few paint a more vivid or varied picture of the joys of riding than this collection of stories from a motorcycling life by Lance Oliver, who has spent more time than most of us thinking about and writing about the art and practicalities of motorcycling.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

This repair manual covers Suzuki SV650 and SV650S 1999 to 2005.
