GSX-R600 (1997-2000)

This long-awaited new "Star Trek" technical manual--nearly two years in the making--presented in the world-renowned Haynes Manual format details the intricacies of the "Enterprise."

2003-2006 HONDA CBR600RR

XL500S (1979-1981), XL500R (1982), XR500 (1979-1980), XR500R (1981-1984), XL600R (1983-1987), XR600R (1985-1990)

In Asymmetric Returns, financial expert Alexander Ineichen elevates the critical discussion about alpha versus beta and absolute returns versus relative returns. He argues that controlling downside volatility is a key element in asset management if sustainable positive compounding of capital and financial survival are major objectives. Achieving sustainable positive absolute returns are the result of taking and managing risk wisely, that is, an active risk management process where risk is defined in absolute terms and changes in the market place are accounted for. The result of an active risk management process--when successful--is an asymmetric return profile, that is, more and higher returns on the upside and fewer and lower returns on the downside. Ineichen claims that achieving Asymmetric Returns is the future of active asset management. Alexander M. Ineichen, CFA, CAIA, is Managing Director and Senior Investment Officer for the Alternative Investment Solutions team, a key provider within Alternative and Quantitative Investments, itself a business within UBS Global Asset Management. He is also on the Board of Directors of the Chartered Alternative Investment Analyst Association (CAIAA). Ineichen is the author of the two UBS research publications In Search of Alpha—Investing in Hedge Funds (October 2000) and The Search for Alpha Continues—Do Fund of Hedge Funds Add Value? (September 2001). As of 2006 these two reports were the most often printed research papers in the documented history of UBS. He is also author of the widely popular Absolute Returns—The Risk and Opportunities of Hedge Fund Investing, also published by John Wiley & Sons.

Solutions to odd-numbered problem set questions in Modern Macroeconomics. Solutions to odd-numbered problem set questions in Modern Macroeconomics.

How critical is education in the development struggle of a third world country? Responding to popular demands for more accessible education, the Guyanese government instituted numerous educational reforms, hoping to promote economic growth in both the modern and the traditional sectors of the economy. Many in the traditional sector, however, saw education as a means of economic advancement, and sought increasingly to move into higher social strata through employment in the modern sector. Consequently, the civil service and private firms gained an oversupply of personnel, while agriculture and small business suffered, and unemployment increased. The author examines Guyana's educational system from historical, political, social, and economic perspectives, and draws implications for other developing countries.
