This new study challenges how we think about international relations, presenting an analysis of current trends and insights into new directions. It shows how the discipline of international relations was created with a purpose of helping policy-makers to build a more peaceful and just world. However, many of the current trends, post-positivism, constructivism, reflectivism, and post-modernism share a conception of international theory that is inherently incapable of offering significant guidance to policy-makers. The Power of International Theory critically examines these approaches and offers a novel conventional-causal alternative that allows the reforging of a link between IR theory and policy-making. While recognizing the criticisms of earlier forms of positivism and behaviouralism, the book defends holistic testing of empirical principles, methodological pluralism, criteria for choosing the best theory, a notion of 'causality,' and a limited form of prediction, all of which are needed to guide policy-makers. This is an essential book for all students and scholars of international relations.

Doing Youth Participatory Action Research offers an unprecedented, in-depth exploration of the pragmatics and possibilities of youth-driven research. Drawing upon multiple years of experience engaging youth in rigorous, critical inquiry about the conditions impacting their lives, the authors examine how YPAR encourages the educational community to re-imagine the capabilities of young people and the purposes of teaching, learning, and research itself. Much more than a "how-to" guide for those interested in creating their own YPAR projects, this book draws upon the voices of students and educators, as well as the multiple historical traditions of critical research, to describe how youth inquiry transforms each step of the traditional research process. From identifying research questions to collecting data and disseminating findings, each chapter details how YPAR revolutionizes traditional conceptions of who produces knowledge, how it is produced, and for what purposes. The book weaves together research, policy, and practice to offer YPAR as a practice with the power to challenge entrenched social and educational inequalities, empower critically aware youth, and revolutionize pedagogy in classrooms and communities. For researchers, educators, community members, and youth who want to connect, question, and transform the world collectively, Doing Youth Participatory Action Research is a rich source of both pragmatic methodological guidance and inspiration.
