The all-new Dacia Sandero has been revealed by the budget brand in hatchback and Sandero Stepway crossover models.. The new Dacia Sandero looks far more modern than the outgoing car. Where the old Dacia Sandero looked almost wilfully dated, the new car looks modern, with a sloping windscreen, a lower roofline and completely remodelled front and rear bumpers.

For over ten years, Top Gear has been travelling all over Britain in the course of making the world's best programme about cars, driving, and three men in smart-casual clothes shouting at each other. So, who better to assemble a guide to Britain itself with all its glories, quirks and multiple words for bread rolls? This book is not only a guide for outsiders; it is an invaluable reference

manual for Britons themselves, like a mirror held up to our very souls.* Join us then, as we travel from A-Z cataloguing and making moderately flippant remarks about every aspect of life and living in the best country in the world after New Zealand, Denmark, probably Canada and some bits of France. *Although in this case, a mirror that has been dropped and then run over by a small lorry but don't worry, some bits of it still just about work.

The illustrations stylize the placement of wheels and chassis and the distinctive qualities of passenger compartments...valuable resource"--Booklist Cars today fit a fairly small number of body types--sedan, coupe, station wagon, SUV, hatchback and a few others. The meanings of these familiar terms have changed over the decades as automotive design has evolved. Along the way, a greater number of earlier body types have fallen out of use and become historical curiosities. Who today can

identify a charabanc, a dos-a-dos or even a phaeton? In this expanded second edition, the dictionary defines with clear line drawings all distinct body types from the early days of the automobile, many of which were derived from established models of horse-drawn vehicles. Entries describe popular types and variations from different countries and time periods. Subtypes and subtle distinctions are explained and common misuses of terms and designations are clarified.

Jeremy Clarkson gets under the bonnet in Clarkson on Cars - a collection of his

motoring journalism. Jeremy Clarkson has been driving cars, writing about them and occasionally voicing his opinions on the BBC's Top Gear for twenty years. No one in the business is taller. In this collection of classic Clarkson, stretching back to the mid-1980s, he's pulled together the car columns and stories with which he made his name. As coal mines closed and house prices exploded to a soundtrack of men in make-up playing synthesizers, Jeremy was already waxing lyrical on topics as useful and diverse as: * The perils of bicycle ownership * Why Australians

* Why soon only geriatrics
will be driving BMWs * The
difficultly of deciding on

that bus lanes cause traffic

and offensive to almost
everyone, this is writing

the brake lines cut and the
speed limit smashed to
smithereens. Sit back and

In *The New Woman in Early Twentieth-century Chinese Fiction*, Jin Feng discusses representations of women in May Fourth fiction, issues of gender, modernity, individualism, subjectivity, and narrative strategy. In this thought-provoking book about a crucial period of Chinese literature, Feng argues that male writers such as Lu Xun, Yu Dafu, Ba Jin, and Mao Dun created fictional women as mirror images of their own political inadequacy, but that at the same time this

was also an egocentric ploy to affirm and highlight the modernity of the male author. This gender-biased attitude was translated into reality when women writers emerged. Whereas unfair, gender-biased criticism all but stifled the creative output of Bing Xin, Fang Yuanjun, and Lu Yin, Ding Ling's dogged attention to narrative strategy allowed her to maintain subjectivity and independence in her writings; that is until all writers were forced to write for the collective.

Innovation isn't what it used to be Traditionally a synonym for sophistication,

hi-tech and expense, today it means seeking frugality, mining segments that the competition has abandoned and accessing new customers whose modest incomes meant they were once ignored. The West used to conceptualise innovation for its own purposes. Today, it is being developed increasingly for - and soon by - the emerging world. The Logan's adventure epitomises these new innovation trajectories and outlines new frontiers for its industry. The question then becomes how and why a company like Renault chose this path; how it withstood so many surprises and obstacles to become one most

spectacular success stories of the early 21 st century; and whether this success might destabilise European industrialists' traditional development model. Following an in-depth investigation behind the scenes at Renault and Dacia, the book's three authors - economists and managers specialised in the automotive industry - provide an answer to these and other questions. Beyond the automotive sector, the book is also useful to anyone tracking current upheavals in the world's economic equilibrium and interested in how corporate innovation processes might contribute to this trend.
