This book presents the most up-to-date and comprehensive guide to the current and potential future state of weed science and research. Weeds have a huge effect on the world by reducing crop yield and quality, delaying or interfering with harvesting, interfering with animal feeding (including poisoning), reducing animal health and preventing water flow. They are

common across the world and cost billions of dollars worth of crop losses year on year, as well as billions of dollars in the annual expense of controlling them. An understanding of weeds is vital to their proper management and control, without which the reduction in crop yields that they would cause could lead to mass starvation across the globe. Topics covered include weed biology and ecology, control of weeds and particular issues faced in their control. Authored and edited by internationally renowned scientists in the field all of whom are actively involved in European Weed Research Society working groups, this succinct overview covers all the relevant aspects of the science of weeds. Weed Research: Expanding Horizons is the perfect resource for botanists, horticultural scientists, agronomists, weed scientists, plant protection specialists and

Stephanie Izard knows how to inspire, captivate, and cook up a storm. Fan favorite and the first and only woman to win on TV's Top Chef, she's also the chef and owner of the acclaimed Girl & the Goat restaurant in Chicago. The Girl in the Kitchen collects more than 100 of Izard's best recipes, from innovative appetizers like Asian-Spiced English Peas to luscious desserts like Quince and Fig Cobbler with Vanilla Mascarpone. Beautifully photographed and bursting with flavor, personality, and insights into the top chef's process including where she finds her cooking muses, how she shops for food, and which beers and wines she chooses to accompany her meals this book represents the culmination of a craft and provides inspiration that reaches far beyond the kitchen walls.

Text, "exploded view" photographs, and labels reveal everyday objects and their parts.

'My life has been filled with beautiful memories of food: hawker noodle dishes eaten as a child in Malaysia, late-night suppers near my apartment in Tokyo, the best grilled chicken from a Thai street market, and my grandmother's famous Hainanese Chicken Rice. These dishes all sit fondly in my memory, but they also tell their own stories of rich tradition and culture. They are stories that are centuries old, but which have not yet ended. With each new dish we make we add our own experiences and tastes. 'There is a Confucian proverb that translates roughly to "Consider old things to understand new things". This is the essence of the Two Asian Kitchens. The Old Kitchen

This book aims to explore the avenue of landscape economics and provides the building blocks (from different scientific disciplines) for an economic analysis of landscapes. What exactly constitutes and determines the value of a landscape? It focuses on the value of landscapes in its broadest sense, thereby covering a variety of topics including stakeholder involvement in landscape design, landscape governance and landscape perceptions from different countries. Merely saying that landscapes have value or are important is not sufficient – not when resources are scarce and have alternative uses. Measuring and quantifying the economic value of changes

in landscapes would help ensure that landscape management decisions are both (economically) rational and sound.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

This book is an updated history of the

American comic book by an industry insider. You'll follow the development of comics from the first appearance of the comic book format in the Platinum Age of the 1930s to the creation of the superhero genre in the Golden Age, to the current period, where comics flourish as graphic novels and blockbuster movies. Along the way you will meet the hustlers, hucksters, hacks, and visionaries who made the American comic book what it is today. It's an exciting journey, filled with mutants, changelings, atomized scientists, gamma-ray accidents, and supernaturally empowered heroes and villains who challenge the imagination and spark the secret identities lurking within us.
