compiled by workers of the Writers' program of the Work projects administration in the state of Nevada. Sponsored by Dr. Jeanne Elizabeth Wier, Nevada state historical society, inc.

During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. America's Silver State takes the gold in the WPA Guide to Nevada. Originally published in 1940, the guide features the newly built Hoover Dam (then called the Boulder Dam), the Great Basin, the many caves in the eastern part of the state, the state's several ghost towns, and an engaging essay of one of Nevada's more important industries—"Mining and Mining Jargon."

This bibliography brings together in one comprehensive volume citations of books, dissertations, theses, and ERIC microfiche relating to the history of specific institutions of higher education worldwide. All types of postsecondary institutions--two years colleges, liberal arts colleges, seminaries, specialized institutions, and universities--are included. Entries include the following elements when available: author/editor, title, place of publication, publisher, publication date, and number of pages. Citations from 85 countries are included. Entries are by country, dependency, and territory. The United States has been further divided by state. Names of institutions are in English. References are in the language in which they were written. The majority of the citations should be available in a library somewhere in the United States. Obscure sources that may be difficult to obtain have been included because they are often the only citation. All editions of a title as well as older works are included because of their potential value to a researcher. The book should be a part of all college, university, and large public library collections. College of Education faculty members specializing in higher or comparative education will find much of value here.
