Nutrition Counseling and Education Skills: A Guide for ...

NUTRITION COUNSELING AND EDUCATION SKILL DEVELOPMENT, 3rd Edition, is a step-by-step guide to help entry-level practitioners through the basic components involved in changing food behavior and improving nutritional status. This book provides nutritional professionals with a solid foundation of counseling and education principles, opportunities to practice new skills, and knowledge of evaluation methodologies in an organized, accessible, and engaging approach. The authors' clear style helps readers translate theoretical perspectives on nutrition counseling into actual effective dialogues between client and counselor to influence client knowledge, skills, and attitudes. In addition, since the goals and objectives of nutrition counselors and educators complement each other, the scope of this text has expanded to include elements unique to nutrition education. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The text covers communications, counseling, interviewing, motivating clients, delivering oral presentations and using media in presentations. Communication is basic to the relationship that the Registered Dietitian (RD) professional has with their clients. The Academy of Nutrition and Dietetics recognizes the importance of communication skills for practitioners to promote health, disease prevention and treatment. Providing people with information on what to eat is not enough, the RD must also promote and facilitate behavior changes to more healthful food choices. The text incorporates the Nutrition Care Process (NCP) and model, including four steps of nutrition assessment, nutrition diagnosis using PES statement (Problem, Etiology and Signs/Symptoms), nutrition intervention, and nutrition monitoring and evaluation. The PES statements are the most critical in that the Academy of Nutrition and Dietetics has been stressing this as an essential component of their standards and requirements. The text uses activities, case studies, self assessment questions, web references and graphics to engage the student and drive the content home.

Now in vibrant full color, this updated Seventh Edition of Holli's best-selling Nutrition Counseling and Education Skills: A Guide for Professionals helps students develop the communications, counseling, interviewing, motivational, and professional skills they'll need as Registered Dietitian professionals. Throughout the book, the authors focus on effective nutrition interventions, evidence-based theories and models, clinical nutrition principles, and knowledge of behavioral science and educational approaches. Packed with activities, case studies, and self-assessment questions, the Seventh Edition features new content that reflects the latest changes in the field, new online videos that bring nutrition counseling techniques to life, and a powerful array of new and enhanced in-text and online learning tools.

Through appropriate counseling and intervention, nutritionists play an important role in encouraging clients to make and maintain healthy dietary changes. Nutrition Counseling Skills for the Nutrition Care Process, Fourth Edition, provides the latest counseling theory and communication techniques for clinical and community settings within the context of the American Dietetic Association Nutrition Care Process. The Fourth Edition focuses on tailoring intervention strategies to a client's dietary needs through effective interviewing, assessment, and counseling. This revision addresses the unique needs nutrition counselors face regarding obesity, heart disease, diabetes, renal disease, hypertension, cancer, eating disorders, and pregnancy.

This practical text presents a wealth of fresh ideas and techniques for strengthening counseling skills to face real-world issues in nutrition therapy. It offers students and practitioners advice on ways to increase referrals, decrease no-shows, and overcome common barriers to effective counseling. The Third Edition also explores strategies for counseling patients with AIDS, diabetes, and other chronic diseases, for group therapy, for teaching developmental skills, and for end-of-life counseling. This edition has a new reader-friendly design and layout. New learning activities—including case studies and critical thinking exercises—encourage students to apply what they have learned to common situations in clinical practice.

Nutrition Counseling and Education Skill Development, 2nd Edition is a step-by-step guide to help entry-level practitioners through the basic components involved in changing food behavior and improving nutritional status. This book provides nutritional professionals with a solid foundation of counseling and education principles, opportunities to practice new skills, and knowledge of evaluation methodologies in an organized, accessible, and engaging approach. The author's clear style helps readers translate theoretical perspectives on nutrition counseling into actual effective dialogues between client and counselor to influence client knowledge, skills, and attitudes. In addition, since the goals and objectives of nutrition counselors and educators complement each other, the scope of this text has expanded to include elements unique to nutrition education. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Marcia Herrin and Maria Larkin have collaborated on the second edition of Nutrition Counseling in the Treatment of Eating Disorders, infusing research-based approaches and their own clinically-refined tools for managing food and weight-related issues. New to this edition is a section on nutrition counseling interventions derived from cognitive behavioral therapy-enhanced, dialectical behavioral therapy, family-based treatment, and motivational interviewing techniques. Readers will appreciate the state of the art nutrition and weight assessment guidelines, the practical clinical techniques for managing bingeing, purging, excessive exercise, and weight restoration as well as the unique food planning approach developed by the authors. As a comprehensive overview of food and weight-related treatments, this book is an indispensable resource for nutrition counselors, psychotherapists, psychiatrists, physicians, and primary care providers.

Malnutrition and obesity are both common among Americans over age 65. There are also a host of other medical conditions from which older people and other Medicare beneficiaries suffer that could be improved with appropriate nutritional intervention. Despite that, access to a nutrition professional is very limited. Do nutrition services benefit older people in terms of morbidity, mortality, or quality of life? Which health professionals are best qualified to provide such services? What would be the cost to Medicare of such services? Would the cost be offset by reduced illness in this population? This book addresses these questions, provides recommendations for nutrition services for the elderly, and considers how the coverage policy should be approached and practiced. The book discusses the role of nutrition therapy in the management of a number of diseases. It also examines what the elderly receive in the way of nutrition services along the continuum of care settings and addresses the areas of expertise needed by health professionals to provide appropriate nutrition services and therapy.

The third edition Counselling Skills for Dieticians has been fully revised and updated to reflect the recent developments, research and interests in the field. It explores the skills required for dietetic counselling, and includes frequent examples of dialogue from patient consultations, as well as exercises and activities so that the reader can undergo experiential learning relevant to their practice. Includes examples from daily practice to illustrate the difficulties encountered by dietitians and demonstrate the application of counselling skills Clearly explains theoretical models of accepted counselling practice underpinning the skills described Has been updated to include additional information on topics such as assertiveness skills and eating distress Addresses practical and psychological issues faced by dietitians and patients Includes the latest research evidence for counselling skills in dietetic practice Draws upon research evidence, theory and experience from the fields of psychotherapy and counselling Now provides access to a range of supportive online material including videos of consultations, case studies and resources for trainers

This book is a step-by-step guide to the fundamental skills of nutritional counseling strategies and protocol, complimented by action-based worksheets and practical case studies. The authors provide a solid foundation of counseling and education principles, opportunities to practice new skills, and knowledge of evaluation methodologies.
