The first book of its kind, How to Rebuild the Honda B-Series Engineshows exactly how to rebuild the ever-popular Honda B-series engine. The book explains variations between the different B-series designations and elaborates upon the features that make this engine family such a tremendous and reliable design. Honda B-series engines are some of the most popular for enthusiasts to swap, and they came in many popular Honda and Acura models over the years, including the Civic, Integra, Accord, Prelude, CRX, del Sol, and even the CR-V. In this special Workbench book, author Jason Siu uses more than 600 photos, charts, and illustrations to give simple step-by-step instructions on disassembly, cleaning, machining tips, pre-assembly fitting, and final assembly. This book gives considerations for both stock and performance rebuilds. It also guides you through both the easy and tricky procedures, showing you how to rebuild your engine and ensure it is working perfectly. Dealing with considerations for all B-series engines-foreign and domestic, VTEC and non-VTEC-the book also illustrates many of the wildly vast performance components, accessories, and upgrades available for B-series engines. As with all Workbench titles, this book details and highlights special components, tools, chemicals, and other accessories needed to get the job done right, the first time. Appendices are packed full of valuable reference information, and the book includes a Work-Along-Sheet to help you record vital statistics and measurements along the way. You'll even find tips that will help you save money without compromising top-notch results.

This small book is the first comprehensive essay to place archetypal psychology within a major tradition of modern thought-the tradition of mythical thinking-and to recognize imagination as the primal force and basic reality of human life. By drawing upon the writings of four twentieth-century thinkers, Roberts Avens clarifies the post-Jungian direction of psychology as it moves toward poetic and polytheistic imagination. He then compares the radical achievements of this direction in resolving the 'ego-question' with the methods and ideas of the East: Buddhism, Tantrism, Zen, and Vedanta. Avens's grasp

of understanding, easy familiarity with his subject, and refined insights together make this book an introductory text and an advance into new territory.

Hungry for Ecstasy: Trauma, the Brain, and the Influence of the Sixties by Sharon Klayman Farber explores the hunger for ecstatic experience that can lead people down the road to self-destruction, in an attempt to help mental health professionals and concerned individuals understand and identify the phenomenon and ultimately intervene with patients, friends, and loved ones.

Hired by ForbesTraveler.com to review some of the most luxurious accommodations on Earth, and then inspired by a chance encounter in Dubai with the impoverished workers whose backbreaking jobs create such opulence, Bob Harris had an epiphany: He would turn his own good fortune into an effort to make lives like theirs better. Bob found his way to Kiva.org, the leading portal through which individuals make microloans all over the world: for as little as \$25-50, businesses are financed and people are uplifted. Astonishingly, the repayment rate was nearly 99%, so he re-loaned the money to others over and over again. After making hundreds of microloans online, Bob wanted to see the results first-hand, and in *The International Bank of Bob* he travels from Peru and Bosnia to Rwanda and Cambodia, introducing us to some of the most inspiring and enterprising people we've ever met, while illuminating day-to-day life-political and emotional-in much of the world that Americans never see. Told with humor and compassion, *The International Bank of Bob* brings the world to our doorstep, and makes clear that each of us can, actually, make it better.
