My India my Pride. India is one of the oldest civilizations in the world, spanning a period of more than 4000 years, and witnessing the fusion of several customs and traditions, which are reflective of the rich culture and heritage of the Country. The history of the nation gives a glimpse into the magnanimity of its evolution - from a Country reeling under colonialism, to one of the leading economies in the global scenario within a span of fifty years.

This book is totally based upon Indian theme and in this book I tried to show about indian culture, tradition, village, freedom fighter, great personalities, monuments and indian women etc. If someone reads it he/she definitely can know about India in the short basis. I would like to tell honestly that I had been writing this book for 3 years and now it has completed. My whole book is in poetry and whatever I wrote in it, it is the way of poems, according to me when we write in the poems everything feels good and make us refresh because rhyming words speak its identity and quality.

About the book: In India there are several dance forms in vogue and among them seven dance forms Bharatnatyam, Kathak, Kathakali, Kuchipudi, Manipuri, Mohiniyattam, and Odissi which are recognize by the majority of scholars and art lovers as classical dance forms. Each of these seven classical dances has a tradition of several thousand years. These seven dance forms have established themselves as classical dance on the basis of historical background, purity, technical complexities, and maturity. Each of the classical style come from a specific region of India and is governed by certain rules. These rules are applied either consciously or instinctively and are governed by Bharat Muni's "Natyashastra." These dances are performed adopting specific music.

Agriculture is a broad subject. After passing graduation, higher degrees are done in specialized field of Agriculture so there is no need to read all Agriculture subjects in M. Sc. and Ph. D. But for the preparation of various agriculture competition examinations students have to read all the basic books of Agriculture to cover syllabus. That time most of students don't have all the necessary books and too much time to read them. Therefore to overcome these problems we write this book through reading various books and other sources of Agriculture to cover brief and best information of subjects (Agronomy, Genetics and Plant Breeding, Soil Science and Agricultural Chemistry, Agricultural Microbiology, Physiology, Agricultural Entomology, Plant Pathology, Horticulture, Agricultural Economics, Agricultural Extension And Agricultural Statistics) in one book. The students will treat this book as a competitive book not a text book for various degree courses.

Dr. Kalam is rare legendary personality. On the whole it is very difficult to describe his greatness in words. The manifold aspects of a scientist, philosopher, great human being and a President are embodied in one person which is a source of inspiration for us. This book nicely narrates about his childhood days, life as a scientist and 'Missile Man', contributions towards our country, speeches, quotes. Readers are going to know a lot about Dr. A.P.J. Abdul Kalam through this book. Like as- how he made India a self-dependent country in atomic power, how he maintained the dignity of his position by living with simplicity, how he become the president of India despite not having any political background. This book narrates his vision of India by 2020 as a highly developed nation of the world. The language is simple and easy to understand. A must read book for everyone.

The book addresses the very topical subject of citizen making. By delving into a range of sources - among them survey questions, historical documents, political theory, architectural design, and public policy - the book provides a unique analysis of when and why citizenship has taken root in India. Each chapter highlights the constant innovation of citizenship that has occurred in India's legal, political, social, economic and aesthetic arrangements as well as providing the basis for comparative analysis across South Asian cases and the European Union.
