The story of the famed race to the Moon between the US and the USSR has been told countless times. The strategies of these two superpowers have often been paralleled in a way that highlights their fight for dominance and efforts to develop needed new technologies. This book will show how beneath these surface similarities, the two competing nations employed very different core tactics. It provides a new perspective of the history of the space race by analyzing that history through philately - that is, from the images on postage stamps, post cards, and letters in circulation at that time. Through this fascinating historical visual record, the author shows how the propaganda-heavy approach of the USSR eventually lost out to the more pragmatic approach of the United States.

~~Rule Night James Irwin Holman~~

Autobiography that describes the Apollo 15 voyage to the moon and what it meant to him spiritually.

~~Rule Night James Irwin Holman~~

Comprising papers by such distinguished scholars as John Headley Brooke, James R. Moore, Ronald Numbers, and George Marsden, this collection shows that questions of science have been central to evangelical history in the United States, as well as in Britain and Canada.

In 1974 Jim and Tammy Bakker launched their television show, the PTL Club, from a former furniture store in Charlotte, N.C. with half a dozen friends. By 1987 they stood at the center of a ministry empire that included their own satellite network, a 2300-acre theme park visited by six million people a year, and millions of adoring fans. The Bakkers led a life of conspicuous consumption perfectly aligned with the prosperity gospel they preached. They bought vacation homes, traveled first-class with an entourage and proclaimed that God wanted everyone to be healthy and wealthy. When it all fell apart, after revelations of a sex scandal and massive financial mismanagement, all of America watched more than two years of federal investigation and trial as Jim was eventually convicted on 24 counts of fraud and conspiracy. He would go on to serve five years in federal prison. PTL is more than just the spectacular story of the rise and fall of the Bakkers, John Wigger traces their lives from humble beginnings to wealth, fame, and eventual disgrace. At its core, PTL is the story of a group of people committed to religious innovation, who pushed the boundaries of evangelical religion's engagement with American culture. Drawing on trial transcripts, videotapes, newspaper articles, and interviews with key insiders, dissidents, and lawyers, Wigger reveals the power of religion to redirect American culture. This is the story of a grand vision gone wrong, of the power of big religion in American life and its limits.

Over the past 35 years more than 100 individual astronauts and cosmonauts have performed nearly 200 EVAs, (spacewalks), either singularly or in teams in Earth orbit, deep space or on the Moon. In 'Walking in Space: Development of Space Walking Techniques' the author, Dave Shayler, shows how hardware and crew members are prepared for, protected and supported during every EVA. He demonstrates how past experiences have led to improved training techniques and how this, in turn, has provided many successes and future developments.

How do we know about the select band of astronauts who traveled to the Moon? How were they selected and what happened to them? This book shows how we know about the astronauts and their experiences from primary and other sources. It includes information on some historical detective work that has taken place, using documentary and oral evidence, that has enabled historians to piece together fascinating information about these unique space pioneers.

NASA's publications dominate this comprehensive bibliography of the American space program, with works from many other sources included as well.
