Re-reading Foucault: On

Page 35/62

Download File PDF Sharp

Law, Power and Rights is the first collection in English fully to address the relevance of Michel Foucault's thought for law. Foucault is the best known and most cited of the late twentieth-century's 'theory' academics. His work continues to animate a range of different critical work across intellectual disciplines in the arts,

humanities and social sciences. There has, however, been relatively little examination of the legal implications and applications of Foucault's work. This book fills that gap, providing an in-depth analysis of Foucault's thought as it pertains to a range of different legal themes, such as: the opposition between 'law' and 'the

juridical'; the problem of moral and legal judgment; the historical basis of rights; and the political dimensions (and limitations) of contemporary human rights discourse.

Including contributions from acknowledged experts on Foucault's work, as well as pieces by younger scholars, Re-reading Foucault: On

Law, Power and Rights will be of considerable interest across a range of disciplines, including law, philosophy, political theory, sociology, social theory and criminology.

The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health

authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any

situation in which health care is delivered either to a patient or to a specific group in a population.

Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants.

Definitions of health-care settings are proposed in Appendix 1. These

Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in

practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training

materials and help plan implementation strategies. The document comprises six parts.

This book studies the industrial development of Japan since the mid-nineteenth century, with particular emphasis on how the various industries built technological capabilities. The Japanese were

extraordinarily creative in searching out and learning to use modern technologies, and the authors investigate the emergence of entrepreneurs who began new and risky businesses, how the business organizations evolved to cope with changing technological conditions, and how the managers, engineers, and workers

acquired organizational and technological skills through technology importation, learning-by-doing, and their own R & D activities. The book investigates the interaction between private entrepreneurial activities and public policy, through a general examination of economic and industrial development, a study of

A compelling memoir of a gay Catholic woman struggling to find balance between being a daughter

and a mother raising her son with a loving partner in the face of discrimination. From the time she was born, Michelle Theall knew she was different. Coming of age in the Texas Bible Belt, a place where it was unacceptable to be gay, Theall found herself at odds with her strict Roman Catholic parents, bullied by her classmates,

abandoned by her evangelical best friend whose mother spoke in tongues, and kicked out of Christian organizations that claimed to embrace her—all before she'd ever held a girl's hand. Shame and her longing for her mother's acceptance led her to deny her feelings and eventually run away to a

remote stretch of
mountains in Colorado.

There, she made her home on an elk migration path facing the Continental Divide, speaking to God every day, but rarely seeing another human being. At forty-three years of age and seemingly settled in her decision to live life openly as a gay woman, Theall and her partner

attempt to have their son baptized into the Sacred Heart of Jesus Catholic Church in the liberal town of Boulder, Colorado. Her quest to have her son accepted into the Church leads to a battle with Sacred Heart and with her mother that leaves her questioning everything she thought she knew about the bonds of family and faith.

And she realizes that in order to be a good mother, she may have to be a bad daughter.

Teaching the Cat to Sit examines the modern roles of motherhood and religion and demonstrates that our infinite capacity to love has the power to shape us all.
