Following Conversations on Religion (Continuum 2008), here is a fascinating line up of original interviews tackling one of today's most vexing issues - that of truth. These discussions explore the

question of what truth is, and what role it has in private, public, political and scientific discourses. Some thinkers, see truth as something concrete and immutable, others believe that it is an essentially meaningless concept. And for many contributors it is the practical application of truth which engages them. Each fascinating chapter explores the subject from a new angle, including Nick Davies and Peter Wilby's view on truth in the media, Prof. Martin Kusch's reflections in relation to science and Mary Warnock's consideration of truth in the context of ethics and art. Other contributors include Mary Midgely, Noam Chomsky and A. C. Grayling. This is a book of quite exceptional interest and importance.

Many of the challenges that decision-makers grapple with in relation to climate change are governance related. Planning and decision-making is evolving in ambiguous institutional environments, in which many key issues remain unresolved, including relationships between different actors; funding arrangements; and the sources and procedures for vetting data. These issues are particularly acute at this juncture, as climate adaptation moves from broad planning processes to the management of infrastructure systems. Concrete decisions must be made. *Adapting Infrastructure to Climate Change*

draws on case studies of three coastal cities situated within very different governance regimes: neo-corporatist Rotterdam, neo-pluralist Boston and semi-authoritarian Singapore. The book examines how infrastructure managers and other stakeholders grappling with complex and uncertain climate risks are likely to make project-level decisions in practice, and how more effective decision-making can be supported. The differences across governance regimes are currently unaccounted for in adaptation planning, but are crucial as best practices are devised. These lessons are also applicable to infrastructure planning and decision-making in other contexts. This book will be of great interest to scholars of climate change and environmental policy and governance, particularly in the context of infrastructure management.

This book explores the history of the Dominican Republic as it evolved from the first European colony in the Americas into a modern nation under the rule of Rafael Trujillo. It investigates the social foundations of Trujillo ' s exceptionally enduring and brutal dictatorship (1930-1961) and, more broadly, the way power is sustained in such non-democratic regimes. The author reveals how the seemingly unilateral imposition of power by Trujillo in fact depended on the regime ' s mediation of profound social and economic transformations, especially through agrarian policies that assisted the nation ' s large independent peasantry. By promoting an alternative modernity that sustained peasants ' free access to land during a period of economic growth, the regime secured peasant support as well as backing from certain elite sectors. This book thus elucidates for the first time the hidden foundations of the Trujillo regime.

to success” (Publishers Weekly), featuring seventeen soulful lessons and simple rituals for finding your life’s purpose, improving your relationships, and becoming healthier—all in the time it takes to drink a cup of tea. Drawing on lessons she’s learned throughout her amazing and sometimes difficult life journey, the social entrepreneur and founder of Zhená’s Gypsy Tea shares seventeen soulful lessons to help you overcome obstacles, clarify your purpose, and bring awareness to each moment of your life. An inspiring roadmap for discovering the secrets of happiness and success for yourself at any stage in life, *Life By the Cup*’s message is that, no matter where you are, you can change your circumstances and live your dreams. As a twenty-four-year-old single mom, Zhená had an infant in need of life-saving surgery and only six dollars in her wallet. She also had two other powerful motivators: hope and a passion to share her unique tea blends with the world. Combining her kitchen hobby of blending tea, her knowledge of herbs and aromatherapy, and her gypsy grandmother’s wisdom, Zhená started selling custom teas from a cart on California street corners. Now, over a decade later, her son is healthy and Zhená’s Gypsy Tea is a multimillion-dollar brand. Zhená’s insights and gentle guidance will inspire you to increase your compassion toward others as well as yourself. You’ll also gain wisdom on how to hone your intuition, ask for help, and live out your true purpose without drastically changing the way you live. Discover your calling, bolster your courage, develop your own flavor of success, and you’ll see your own passion make a meaningful difference in the world.

Danger to the world revolves around an eccentric archaeologist's controversial work on Gobekli Tepe and the search for an ancient source of power.

In this book, highly respected scholars have gathered to discuss the history of investigations of women,
