This fully updated Fifth Edition explores the full psychiatric nursing curriculum, from theoretical foundations to application of interventions for commonly encountered disorders. The focus is on treatment modalities, nursing care, therapeutic communication, and self-awareness. The built-in study guide helps reinforce student learning and knowledge retention. Abundant features highlight the most pertinent learning concepts.

Increase your awareness and understanding of a holistic view of mental health care with this book for nurses and other health care professionals. Each chapter covers a specific psychological or psychosocial problem as well as the most current interventions and treatments. This edition features full-color illustrations, updated drug information, and a chapter on complementary and alternative therapies, in addition to more case studies to help you apply the content to real life. This solid background in mental health is just what you need to work comfortably with clients who exhibit both effective and maladaptive behaviors. Multidisciplinary care plans for sample clients show how members of the health care team work together. Client-specific case studies highlight particular mental disorders and help you apply chapter content to real-life situations. "Think About" boxes throughout the text strengthen your critical-thinking skills. UNIQUE "Drug Alert" boxes highlight what you need to know about a wide range of specific psychotherapeutic medications. UNIQUE Standard LPN full-color design and "Content Threads" point out key information and special features in each chapter, consistent with the format of other books in the LPN Threads series. Appendixes give you easy access to mental health care standards, DSM-IV TR diagnoses, and assessment tools that are essential for providing quality care. FREE workbook at the end of the book includes crossword puzzles, multiple-choice questions, and other exercises to boost your comprehension of the material. FULL-COLOR illustrations make the text even more visually appealing and user-friendly. Additional case studies help you apply chapter content to more real-life scenarios such as chronic illness and substance abuse with accompanying questions to test your critical-thinking skills. Chapter on complementary and alternative therapies increases your awareness of the benefits and risks of alternative therapies such as ayurveda, herbal supplements, massage, meditation, acupuncture, and telemedicine. Forensic nursing content familiarizes you with the prevention and treatment of violence-based disorders and shows you how to obtain and document evidence for legal purposes. NEW antianxiety and antimanic drug information keeps you up-to-date on the latest psychotropic medications.

This exceptional text builds your knowledge of pharmacology by first providing an overview of pharmacologic principles and then teaching you how to apply those principles to clinical practice. Focusing on applying pharmacologic scientific knowledge to clinical practice, it explains diagnostic and treatment reasoning and rational drug selection, while providing useful clinical pearls from experienced practitioners.

Accompanying CD-ROM has review questions for the NCLEX examination, interactive exercises, animations, and an audio glossary.

The First UK Edition of this popular core text explores the full mental health nursing care continuum within a flexible, person-centred framework. It emphasises skilled engagement, collaborative assessment and care-planning, effective therapeutic communication and compassionate, evidence-based interventions. Its reader-friendly format and concise, focused chapters promote self-awareness, effective communication, collaboration and an emphasis on strengths and resources. Mental Health Nursing First UK Edition is essential reading for pre-registration students at diploma and degree level, on both adult and specialist mental health nursing courses, and as a resource for post-registration clinicians. Kevin Acott is Mental Health Tutor/Branch Leader (MH) in the University of Surrey's Faculty of Health & Medical Sciences.

Assure your mastery of medical-surgical nursing knowledge while honing your critical thinking and test-taking skills. The 3rd Edition of this popular resource features over 2,300 questions (including 550 alternate-format questions) that reflect the latest advances in medical-surgical nursing and the latest NCLEX-RN® test plan. They organize the seemingly huge volume of information you must master into manageable sections divided by body systems and specific diseases

Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010.

This text fills a void in advanced practice nursing literature by providing a foundation for integrating psychopharmacology, psychotherapy and Complementary and Alternative Medicine (CAM) into advanced practice nursing. The text includes coverage of neurobiology, theory and research evidence related to psychopharmacology, psychotherapy and complementary and alternative medicine interventions. This text addresses the issue of defining and integrating relationship-based approaches with psychopharmacological and CAM approaches by providing beautifully-designed and easy-to-follow decision trees for initiating specific treatment and discussion of specific continuing care issues. This text has a lifespan focus and includes pediatric pointers and aging alerts.
